ELEVATE YOUR CRAFT WITH **U**VISION 3D LANDSCAPE CREATOR

UVISION ALLOWS YOU TO VISUALLY COMMUNICATE YOUR DESIGN IDEAS TO YOUR CLIENT IN BOTH 2D PLAN VIEW AND 3D PERSPECTIVE VIEW

Whether you're coming from the hand-drawn world, or a 2D AutoCAD background, the biggest impact you'll see from adopting this 3D design software is in how well the client will understand the project you are selling. **Uvision 3D Landscape Creator** is an easy-to-use software that helps bring your designs ideas to life.

Over **50 years** of
Timeless Beauty

Deep, rich colors and a multitude of unique textures combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones to the classic luxury of riven natural stone slabs. Our Elegance collection offers styles you can't get anywhere else, and the look you purchase is the look that will last, with up to 4x the strength of poured-in-place concrete.

Superior Durability, Timeless Appeal.

It's just one of the many revolutionary product families we brought to North America. And we're just getting started.

Color stays
true longer

Learn
More

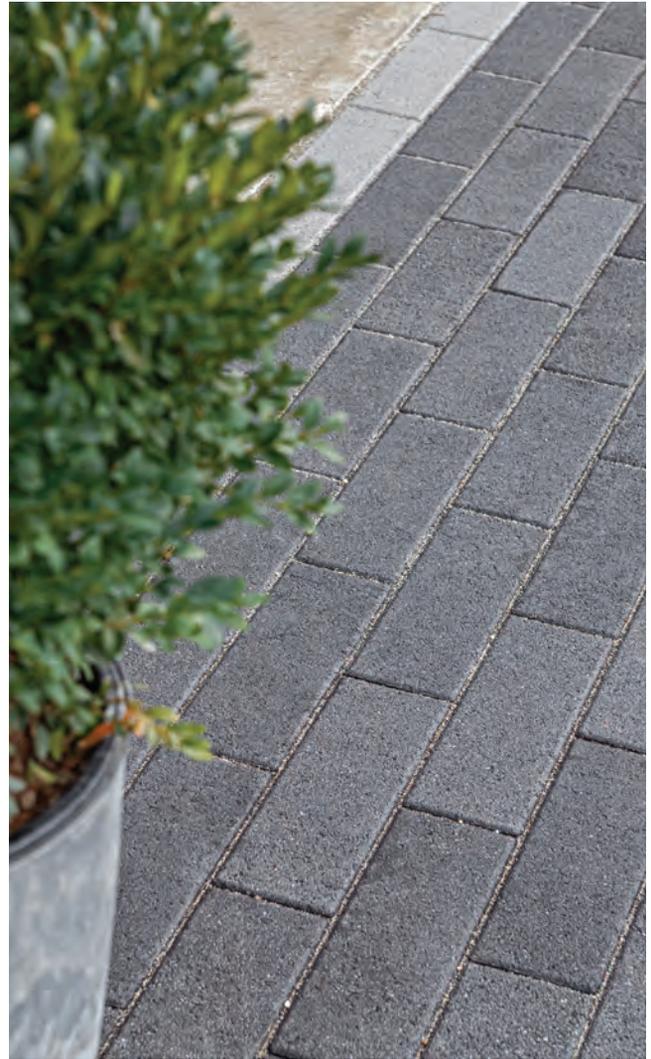

In 2021, Unilock announced its commitment to becoming a carbon neutral company.

Revolutionary EcoTerra technology offers a sustainable paving solution with its cement-free face-mix. It provides high compressive strength, low absorption, and remarkable colourfastness, all while contributing up to a 15% reduction in carbon dioxide emissions. Additionally, EcoTerra products are designed to be free of efflorescence.

 100 x 300 x 80mm

See page 70 for more product details.

EcoTerra is a cutting-edge paving technology that offers a sustainable solution without compromising on quality. Known for its high compressive strength, rfastness, and low water absorption, EcoTerra projects require minimal maintenance while retaining their original aesthetics.

Choosing EcoTerra over traditional pavers is akin to the annual carbon offset of 27 trees being planted, for every 1,000 square feet of pavement. This means that EcoTerra not only delivers superior performance but also contributes to creating a beautiful, eco-friendly outdoor space.

The future of hardscaping hinges on sustainability, making EcoTerra a driver for significant growth in the paving industry.

■ High Compressive Strength

■ Low Water Absorption

LIGHT OPAL BLEND

LIGHT STEEL GREY BLEND

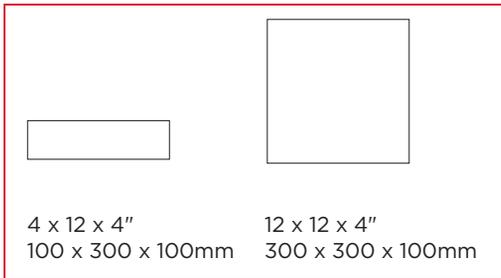

LOAD LOCK™

Special Order only. Minimum qtys apply

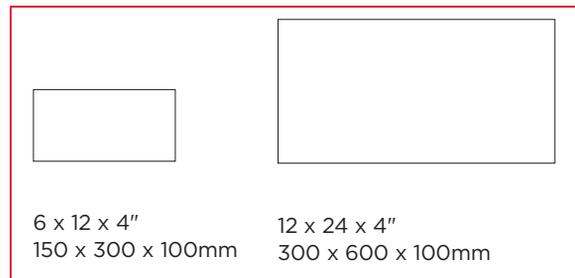

Load Lock™

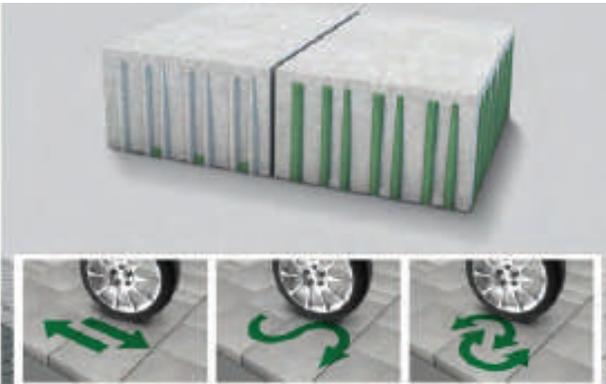

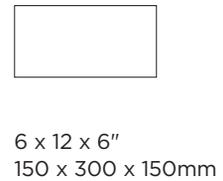

PRODUCT SPECIFICATIONS

4 x 12 x 4" and 12 x 12 x 4" can only be installed together.

6 x 12 x 4" and 12 x 24 x 4" can only be installed together.

LOAD LOCK

For heavy traffic volumes and high loads.

Load Lock pavers are a patented, fully-interlocking system with integrated protection against shifting. The patented jointing technology concentrates on surfaces with heavy traffic volumes and high loads.

The benefits:

- 3D Multi-Direction locking heavy duty vehicular paver
- No displacement or deformation of paving elements
- No tilting or jamming of the paving edges even under the highest loads

EDGE DETAILS

Rounded edge

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
- Compressive Strength > 7,200 PSI avg.
- C67 for Freeze-thaw Durability
- C418 for Abrasion Durability
- Dimensional Accuracy **+/- 3mm**

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

Borders and Accents

Check out this project!

Don't settle for less

The majority of your project's cost lies beneath the surface, in labor and base materials, so don't be tempted to compromise on the product you choose for its surface. Invest in a look you really love, with high quality Unilock products and technologies, so you'll be able to fully enjoy your project for years to come.

Small upgrade - **Big** difference

- ✓ Reduced dirt absorption
- ✓ Enhanced surface color
- ✓ More resistant to wear
- ✓ Stains less likely to develop

See how
it works

PROJECT COST

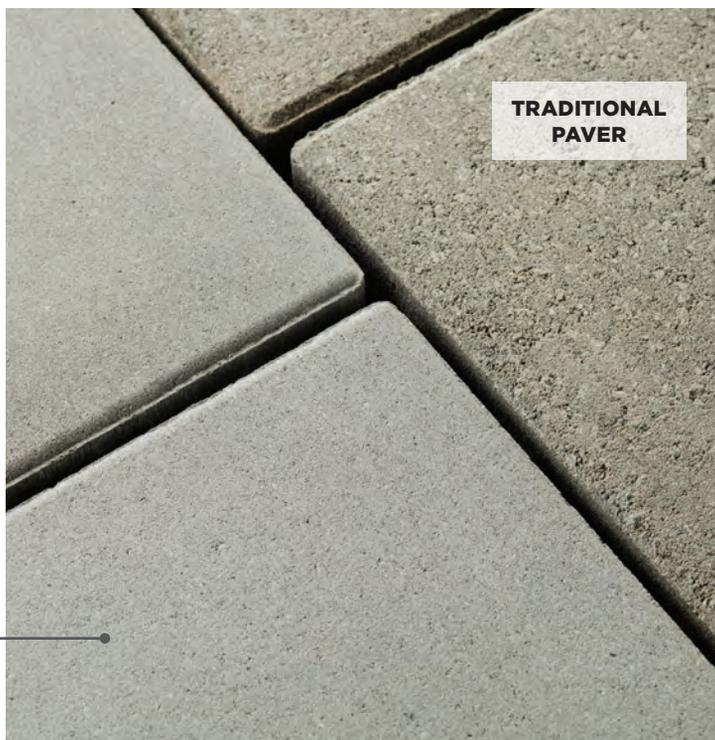

CONSTRUCTION CROSS SECTION

Color that Lasts

Traditional pavers can appear to fade over time as the surface wears to reveal large, lighter colored structural aggregates.

EnduraColor products are different.

A two-step manufacturing process uses concentrated color and wear-resistant materials to produce a refined, color-dense surface that lasts.

ENDURACOLOR™

HELPFUL TOOLS & SUPPORTING PRODUCTS

Hardscape Education Center

Whether you're looking for product knowledge, hardscape training and certification, installation information, or hardscape business support, the Hardscape Education Center contains a vast collection of videos, downloadable PDF's, and articles to help you run a more efficient and profitable hardscape business.

Unilock Channel

Find all the Unilock how-to videos you could ever imagine on our very own YouTube channel - including our Contractor Advantage Canadian Jobsite Edition Series! Everything from how to prepare your base, to choosing the right products, to finishing your project with the right sands and sealers.

UniLyft

UniLyft by Unilock is a paver laying assist machine that will transform the way you install pavers and walls. Whether you operate a large company with an extensive team or you run a three-person operation, UniLyft will benefit your business in two specific ways. It will significantly reduce the time required to complete projects, and your staff will be both safer and less physically exerted during the paver installation process.

U-LEVEL

A sophisticated construction altimeter, U-LEVEL is a grade measurement instrument, ideal for your hardscape design, layout, and installation projects. It's used to record elevations, and can help you make more accurate calculations during excavation for, and construction of, steps, landings, patios, retaining walls and more.

U-VISION

Uvision 3D Landscape Creator Software is the most comprehensive 3D Landscape design tool available in North America. It allows you to design, sell and execute landscape projects of any size. With a robust library of Unilock pavers and walls coupled with 15,000 other hardscape and softscape assets, Uvision 3D Landscape Creator helps bring your client's ideas to life in both 3D and 2D simultaneously.

Polymeric Sands & Sealers

Make sure you're putting the best finishing touch on your hardscape job. Learn how to upsell the project with the proper sands and sealers. Offering these services also gives contractors another way to satisfy their customers and increase their revenue at the same time. Be sure to visit the Hardscape Education Center for best practices when it comes to sands and sealers.

Transferable Lifetime Guarantee

Learn about the Unilock Transferable Lifetime Guarantee - our commitment of quality and strength. We stand behind every stone we make, and this has been a part of our commitment to our customers for over 50 years.

Wall pairing suggestion- Brussels Dimensional Stone - matching colour and finish

RECOMMENDED SAND

Alliance Gator G2 Super Sand

- | Rain safe after 1 hour (no concrete overlays)
- | Sets above 32° F/ 0° C - may vary depending on weather, drainage, bedding materials and installation
- | Can be used for joints up to a max of 2"
- | Dust free and haze free
- | Requires only one watering
- | Two colours: Beige, Slate Grey

Coverage:

Colour	Narrow Joints	Wide Joints
Beige, Slate Grey 50 lb bag	65-85 sqft	22-42 sqft

RECOMMENDED SEALER

Alliance Gator Natural Look Sealer

- | Water-based
- | Zero gloss finish
- | Multi purpose
- | Rain safe after 24 hours

Coverage:

Size	Area
3.78 L / 1 U.S. gal.	175 sqft
18.9 L / 5.28 U.S. gal.	875 sqft

*Please refer to Sands & Sealers on pages 238-241 for more product details

RECOMMENDED SANDS

Alliance Gator Nitro Joint Sand

Pedestrian Applications only

- | Ready mixed and easy to use
- | Permeable
- | Apply rain or shine
- | Hardens from top to bottom up to 2 3/8" (60mm)
- | Must be installed above 37°F (3°C)
- | Avoid power washing for 28 days after application
- | Ideal for joint widths from 3mm (1/8")

Coverage:

Colour	3 mm Joints
Beige, Silver, 40 lb bag / 18.1 kg	84 sqft / 40lb bag
Black	74 sqft
Grey	79 sqft

Eurostone Bond

Pedestrian & Vehicular Applications

- | Setting time - 24 hours without rain for non-drainage base systems
- | Setting time - 1 hour without rain for drainage base systems
- | Sets above 32° F/ 0° C
- | Ideal for cobblestone and natural stone joints up to 1.5" (3.75cm)
- | One colour: Slate Grey

Coverage:

Size	Narrow Joints	Wide Joints
50 lb bag	65 - 85 sqft	22 - 42 sqft

	ASTM #8 IDOT CA-16	12mm	7.3%	912" / HR	27	62	89	151

*Joint Width is measured at the top of the paver. Void Space is calculated at the base of the paver. **Infiltration rate is based on testing done when first installed and is an approximate. Permeable spacers are available for use with extended range of Unilock products.

*Colour selection should be chosen from actual samples.

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
- Compressive Strength > 7,200 PSI avg.
- C67 for Freeze-thaw Durability
- C418 for Abrasion Durability
- Dimensional Accuracy **+/- 3 mm**

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

Notes: This product is optimized for mechanical installation. Product is sold in full bundles only on a refundable skid. **Custom colours are also available. Minimum quantities apply on custom orders.** All measurements are nominal. For more information, samples or custom options, please contact your Unilock Representative or call 1-800-UNILOCK.

APPLICATIONS

Permeable (Heavy Duty)

Pedestrian

Residential Vehicular

Commercial Vehicular

RECOMMENDED SAND

Alliance Gator Aqua Rock
Residential & Commercial Applications

- | For permeable paver joints
- | Helps prevent erosion due to climatic conditions
- | Use as bedding and jointing material
- | Graded to meet ASTM No. 9 water rate
- | Long term high infiltration performance
- | 2,200 lb Super Sack available for large applications

Coverage:

Size	Area
50 lb bag	20-25 sqft
2,200 lb Super Sack	880-1100 sqft

*Please refer to Sands & Sealers on pages 238-241 for more product details

Unsure of bonded vs. unbonded product recommendations? Please contact your Unilock Representative for more information.

*Colour selection should be chosen from actual samples.

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
- Compressive Strength > 7,200 PSI avg.
- C67 for Freeze-thaw Durability
- C418 for Abrasion Durability
- Dimensional Accuracy +/- 3 mm

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

UNILOCK DRIVECEL

- Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures.
- Extremely permeable, long lasting, durable and environmentally friendly. Lightweight and easy to handle.
- Simple and quick installation.
- Allows for easy repairs / adjustments after installation.

DRIVECEL30 LIGHT DUTY
20 x 20 x 1.2"
500 x 500 x 30mm

DRIVECEL50 HEAVY DUTY
20 x 20 x 2"
500 x 500 x 50mm

See page 236 for more details.

*Colour selection should be chosen from actual samples.

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max

APPLICATIONS

Permeable

*Turfstone™ is typically used in erosion control situations. Also known to be used in areas where emergency access routes are required.

RECOMMENDED SAND

Alliance Gator Aqua Rock

- | For Residential & Commercial applications
- | For permeable paver joints
- | Helps prevent erosion due to climatic conditions
- | Use as bedding and jointing material
- | Graded to meet ASTM No. 9 water rate
- | Long term high infiltration performance
- | 2,200 lb Super Sack available for large applications

Coverage:

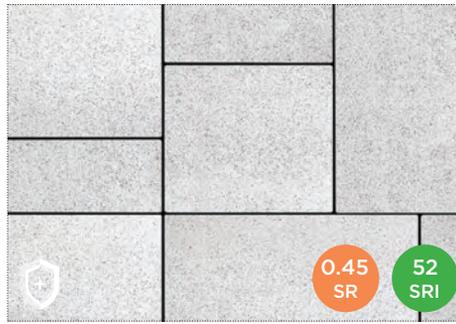

Size	Area
50 lb bag	20-25 sqft
2,200 lb Super Sack	880-1100 sqft

*Please refer to Sands & Sealers on pages 238-241 for more product details

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
 - Compressive Strength > 7,200 PSI avg.
 - C67 for Freeze-thaw Durability
 - C418 for Abrasion Durability
 - Dimensional Accuracy +/- 3 mm
- Test results available upon request*

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

LEED INFORMATION

Rainwater Management: LEED V4:

- Up to three points can be achieved for retaining rainwater onsite based on the percentile kept
- 85% (zero lot line projects only) - 3 points, 95% - 2 points and 98% - 3 points. (All except Healthcare - subtract one point) See LEED v4 for more specific project/site details.

Materials and Resources: LEED V4:

JNILOCK DRIVECEL

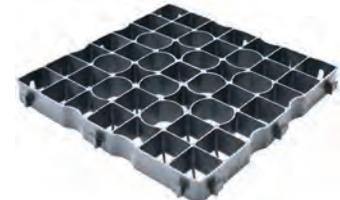

- Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures.
- Extremely permeable, long lasting, durable and environmentally friendly. Lightweight and easy to handle.
- Simple and quick installation.
- Allows for easy repairs / adjustments after installation.

See page 236 for more details.

*Colour selection should be chosen from actual samples.

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
 - Compressive Strength > 7,200 PSI avg.
 - C67 for Freeze-thaw Durability
 - C418 for Abrasion Durability
 - Dimensional Accuracy +/- 3 mm
- Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

LEED INFORMATION

Rainwater Management: LEED V4:

- Up to three points can be achieved for retaining rainwater onsite based on the percentile kept
- 85% (zero lot line projects only) - 3 points, 95% - 2 points and 98% - 3 points. (All except Healthcare - subtract one point) See LEED v4 for more specific project/site details.

Materials and Resources: LEED V4:

- Building Product Disclosure and Optimization
- Sourcing of Raw Materials - Sourcing of Raw Materials and Extraction • 1 point
- Sourcing of Raw Materials - Leadership Extraction Practices • 1 point
- Material Ingredient Reporting - Material Ingredient Reporting • 1 point
- Material Ingredient Reporting - Material Ingredient Optimization • 1 point

RECOMMENDED SAND

Alliance Gator G2 MAXX Sand

- Rain safe after 15 minutes (24hr no rain if concrete overlay)
- Sets above 32° F / 0° C - may vary depending on weather, drainage, bedding materials and installation
- Dust free and haze free
- Requires only one watering
- Four colours: Beige, Grey, Black and Ivory

Coverage:

Colour	Narrow Joints	Wide Joints
Beige, Grey, Ivory 50 lb bag	65-85 sqft	22-42 sqft
Black 50 lb bag	58-76 sqft	20-38 sqft

*Please refer to Sands & Sealers on pages 238-241 for more product details

X & T Slab Spacers

- 250 per bag
- X & T bagged separately
- T spacers 2" x 1"
- X spacers 2" x 2"
- 50 bags per skid

Unilock recommends using slab spacers when installing Arcana on an open grade surface. "T" spacers are needed for running bond patterns. "X" spacers are needed for stack bond patterns. Please contact your Unilock Territory Manager for more information.

*Colour selection should be chosen from actual samples.

- Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures.
- Extremely permeable, long lasting, durable and environmentally friendly. Lightweight and easy to handle.
- Simple and quick installation.
- Allows for easy repairs / adjustments after installation.

See page 236 for more details.

Zero-Bevel edge
50mm, 60mm
& 70mm

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
- Compressive Strength > 7,200 PSI avg.
- C67 for Freeze-thaw Durability
- C418 for Abrasion Durability
- Dimensional Accuracy **+/- 3 mm**

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

LEED INFORMATION

Rainwater Management: LEED V4:

- Up to three points can be achieved for retaining rainwater onsite based on the percentile kept
- 85% (zero lot line projects only) - 3 points, 95% - 2 points and 98% - 3 points. (All except Healthcare - subtract one point) See LEED v4 for more specific project/site details.

Materials and Resources: LEED V4:

- Building Product Disclosure and Optimization
- Sourcing of Raw Materials - Sourcing of Raw Materials and Extraction • **1 point**
- Sourcing of Raw Materials - Leadership Extraction Practices • **1 point**
- Material Ingredient Reporting - Material Ingredient Reporting • **1 point**
- Material Ingredient Reporting - Material Ingredient Optimization • **1 point**
- Environmental Product Declaration • **1 point**

Pedestal system

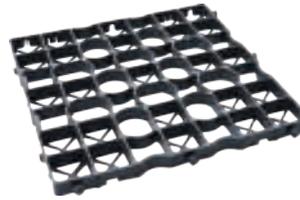

Contact your local Unilock Representative for more details.

See page 228-233 for more details.

- Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures.
- Extremely permeable, long lasting, durable and environmentally friendly. Lightweight and easy to handle.
- Simple and quick installation.
- Allows for easy repairs / adjustments after installation.

See page 236 for more details.

BLACK OYSTER

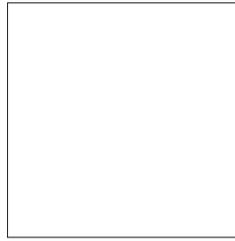

Stone Type	Coarse Grained Granite
Visual Appearance	Charcoal Grey to black with white and black crystals
Origin	Fujian, China
Generic Stone Name	G684 Fuding Black
Age	Jurassic Period (170 million years)
Finish	Sawn 6 sides & Flamed

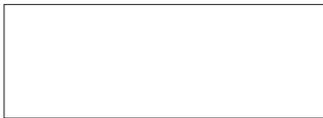

PRODUCT SPECIFICATIONS

12 x 24 x 1 or 2"
300 x 600 x 25 or 50mm

24 x 24 x 1 or 2"
600 x 600 x 25 or 50mm

12 x 36 x 1 or 2"
300 x 900 x 25 or 50mm

Pedestal system

- Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures.
- Extremely permeable, long lasting, durable and environmentally friendly. Lightweight and easy to handle.
- Simple and quick installation.
- Allows for easy repairs / adjustments after installation.

See page 236 for more details.

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption 5% avg - 7% max
- Compressive Strength > 3,000 PSI
- C1262 for Freeze Thaw Durability < 1% mass loss
- C1372 Overall dimensional variations permissible for width, height and length +/- 3mm

Unilock standards exceed 6,000 PSI for Brussels Dimensional Stone® products with:

- 4% absorption avg.
- 5% absorption max.
- Dimensional Accuracy +/- 5/64" (+/-2.00mm)

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption and Compressive Strength > 3000 PSI
- C1262 for Freeze Thaw Durability <1% mass loss
- C1372 Overall dimensional variations permissible for width, height and length +/- 3.2mm

Unilock standards exceed 6,000 PSI for Lineo™ Dimensional Stone products with:

- 4% absorption avg.
 - 5% absorption max.
 - Dimensional Accuracy +/-2.00mm
- Test results available upon request*

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

See Steps, Treads & Coping on section page 210 for more details

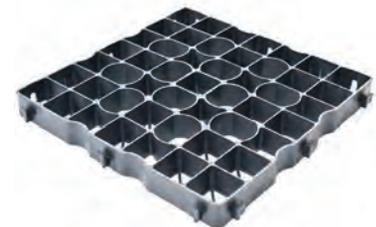

- Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures.
- Extremely permeable, long lasting, durable and environmentally friendly. Lightweight and easy to handle.
- Simple and quick installation.
- Allows for easy repairs / adjustments after installation.

See page 236 for more details.

WALLS | U-CARA®
RETAINING WALLS & VERTICAL FEATURES

U-CARA®

NEW AND IMPROVED

MODULAR SYSTEM

CONSTRUCT CREATIVE VERTICALS WITH SPEED, ACCURACY AND STRENGTH

CONSTRUCTING KITCHENS, GRILL ISLANDS AND PILLARS HAS NEVER BEEN EASIER OR MORE PRECISE, THANKS TO OUR NEW AND IMPROVED U-CARA MODULAR SYSTEM

// ADVANCED MANUFACTURING PROCESS

Laser cut from a single sheet using CNC technology ensures that every component is formed to exact specifications.

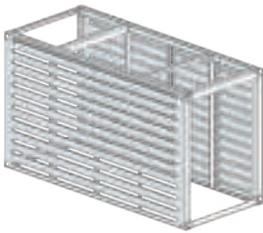

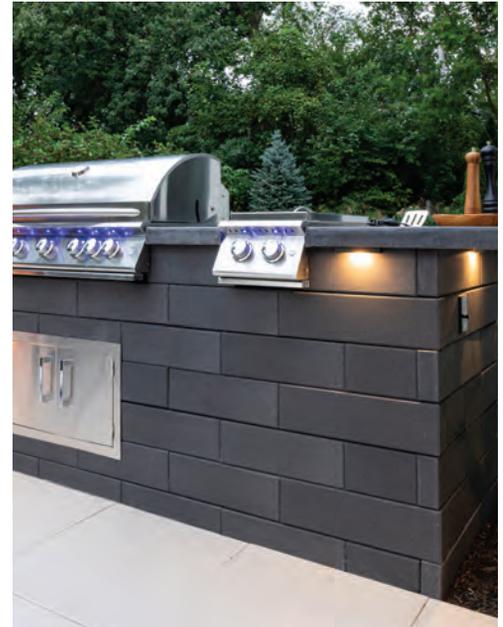

// MADE FROM LIGHTWEIGHT, MARINE-GRADE ALUMINUM

High quality material offers superior strength, corrosion resistance and ease of handling during installation and transportation.

// VERSATILE DESIGN

Now accommodates different sized grill heads up to 42". Also manufactured at standard counter top height.

// LIFETIME STRUCTURAL WARRANTY*

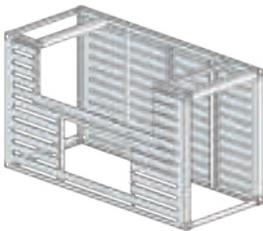

Base Module - Front and Back

Shown with all components

The new U-Cara Modular System units are proudly manufactured in Ontario, ensuring shorter lead times and reduced shipping costs. By keeping production close to home, we maintain strict quality control while minimizing environmental impact.

Measurements do not include concrete.

For additional items including oversized components or for more information, please speak with your Unilock Representative.

*U-Cara Modular System will remain free from material and workmanship defects under normal use and maintenance. Covers the structural integrity and corrosion resistance of the aluminum framework, excluding damage from improper use, unauthorized modifications, or environmental factors.

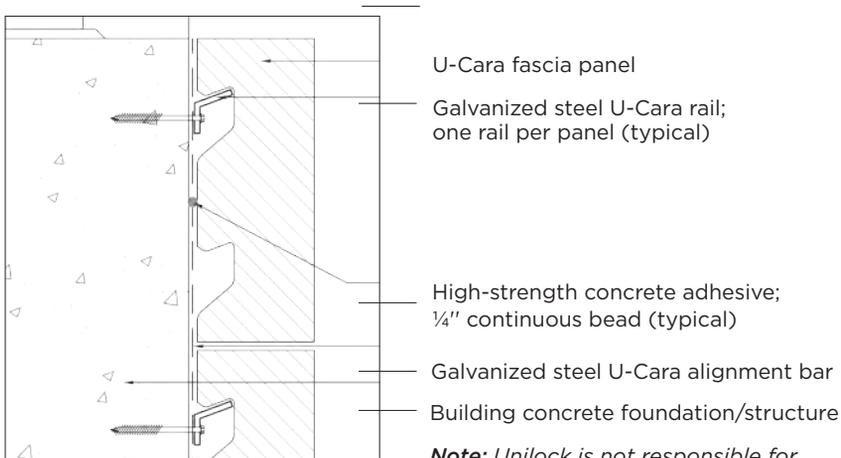

EASILY CLAD STRUCTURES WITH U-CARA TO COMPLEMENT YOUR HARDSCAPE PROJECT

Ideal for garden sheds, wing walls, exposed foundation, existing steps or concrete and wood substrates.

WITH A SIMPLE 3 STEP PROCESS:

- 1 Mount Alignment Bar
- 2 Attach U-Cara Mount Rails
- 3 Hang U-Cara Fascia Panels

Note: Unilock is not responsible for structural strength/integrity of substrates to which the mounting system is attached.

UNILOCK® COLLECTION OF

Steps, Treads, Coping & Caps

From classic, fullnose shapes to pitched-face edges, our steps, treads and coping offer a wide variety of choices for the finishing touch on your project.

Pavers: Umbriano® (Winter Marvel)

Walls: U-Cara® (Umbriano Winter Marvel)
and Umbriano Coping - Chamfered (Winter Marvel)

TECHNICAL INFORMATION

ASTM C 936 Standard Specifications for Solid Concrete Interlocking Paving Units

Conforms to:

- C140 for Absorption and Compressive Strength > 3000 PSI
- C1262 for Freeze Thaw Durability <1% mass loss
- C1372 Overall dimensional variations permissible for width, height and length +/- 1/8" (+/-3.2mm)

Unilock standards exceed 8,000 PSI for Ledgestone™ products with:

- 4% absorption avg.
- 5% absorption max.
- Dimensional Accuracy +/- 5/64" (+/-2.00mm)

Test results available upon request

Meets the U.S. Architectural & Transportation Barrier Compliance Board Slip-Resistance Surfaces Advisory Guidelines

UNILOCK® COLLECTION OF

Hardscape Accessories

HARDSCAPE
ACCESSORIES

NEW

ADVANCED STRUCTURAL FILL SYSTEM

Reduce excavation time, materials and labour with U-Core®, exclusively from Unilock.

U-Core is a patented, lightweight geofoam block designed to replace traditional gravel backfill in applications such as steps, raised patios, walkways and more.

GREATLY REDUCES or eliminates settlement

SOLUTION FOR TIGHT ACCESS areas where transporting aggregate-moving equipment

INSTALL IN MINUTES with the use of U-Core Connectors, locking units together to create a solid structure

LESS EQUIPMENT ONSITE = less wear and tear on machinery typical for transporting, spreading and compacting gravel backfills

LESS GRAVEL DUST, mess, and clean up after projects

REDUCE YOUR COMPANY'S CARBON FOOTPRINT; estimated five to seven times the number of gravel

U-Core Connectors to lock units together

Attach U-Cara panels easily with hangers

STEPS

U-Core is designed to replace all backfilling, compacting and base leveling (at every step) required in traditional step construction. **With U-Core, the step framework can be constructed IN MINUTES**, while significantly reducing the potential for short or long-term settlement.

RAISED PATIOS

U-Core provides a fast, efficient and easy way to place large volumes of structurally stable fill in a fraction of the time, **reduce loads on foundation soils by 90%**, and eliminate lateral pressure on existing structures.

DRIVEWAYS, WALKWAYS & PATIOS

Even where significant fill volumes are not required, such as the base of a walkway or a patio, U-Core can be used to **speed up installation and reduce settlement potential**.

ADJUSTABLE PEDESTAL SYSTEM

UNILOCK SUPPORT SYSTEM FOR PAVERS & SLABS

PEDESTALS FOR PAVERS

Terrace pavers are laying on the pedestals. The floor of the terrace can be raised to any height.

Paver terraces can be used with STANDARD Series, SPIRAL Series, MAX Series.

- No glues
- No adhesives
- No additional drying time

Unilock provides a versatile and sustainable solution to support elevated pavers. It provides a cavity to conceal services, improves heat and sound insulation, and facilitates rapid surface drainage, while allowing waterproofing and services to remain accessible. It also eliminates efflorescence and algae growth and reduces paver installation cost.

ABOUT THE UNILOCK PEDESTAL SYSTEM

Unilock provides a height and slope adjustable pedestal system for paver support engineered to reduce material, construction and lifecycle costs.

It caters to a wide range of height requirements, from 30mm - 420mm, using only three main components parts (Top, Extender and Base). Accessories include top and bottom slope-correctors, spacer tabs, rubber shims and height extenders.

SUPPORTS GREEN BUILDING CERTIFICATION

Unilock pedestals are manufactured from recycled plastics, which meet Green Building practices.

HIGH COMPRESSIVE STRENGTH

Unilock pedestals have high ultimate compressive strength for various height combinations.

ADVANTAGES

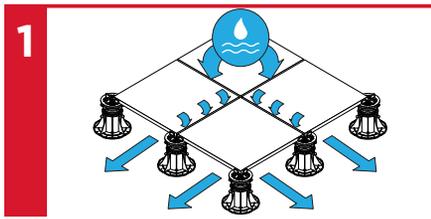

- Easy to install and lightweight
- Progressive height increments
- Slope correction
- Reduce surface lift caused by heavy wind
- Made from recycled plastics
- Easily removed and reused

CONSTRUCTION BENEFITS

Unilock provides a quick-to-install alternative to on-site fabricated concrete or metal piers. It allows convenient progressive height adjustments and correction for fall.

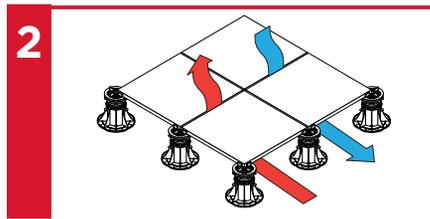

The large flat base and rounded edges do not penetrate to compromise waterproofing membranes. The base flange design prevents water ponding and breeding of pests.

Unilock's pedestal turning tool connected to a power drill permits height adjustments to be made with minimum effort.

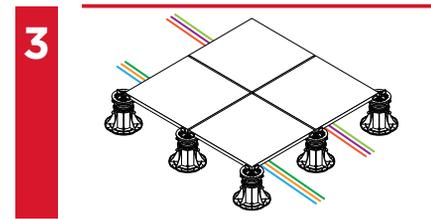

1 FAST WATER DRAINAGE

The gaps between pavers or planks enable quick and unobstructed drainage from the terrace surface, preventing water from pooling

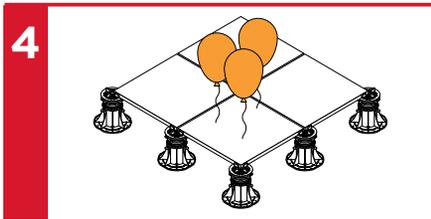

2 ADDITIONAL THERMAL INSULATION

The adjustable-height pedestal system enhances thermal insulation. The open space between the terrace surface and the insulation layer allows continuous air circulation, which helps extend the lifespan of the waterproof membrane.

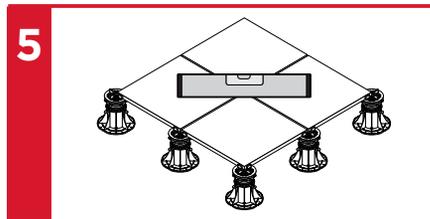

3 ANY KIND OF INSTALLATIONS CAN BE PLACES UNDER THE TERRACE

A pedestal-raised floor terrace allows for installations beneath the surface. Cables can be laid freely underneath and remain easily accessible at any time.

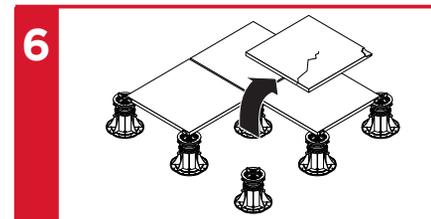

4 LOWER WEIGHT

Terrace floors built on adjustable-height pedestals don't require multiple heavy adhesive layers, making the entire system significantly lighter.

5 EVEN SURFACE

With adjustable pedestals, leveling the terrace floor becomes effortless. The system ensures a stable structure and a perfectly even surface

6 FAST REPLACEMENT OF DAMAGED TERRACE MATERIAL

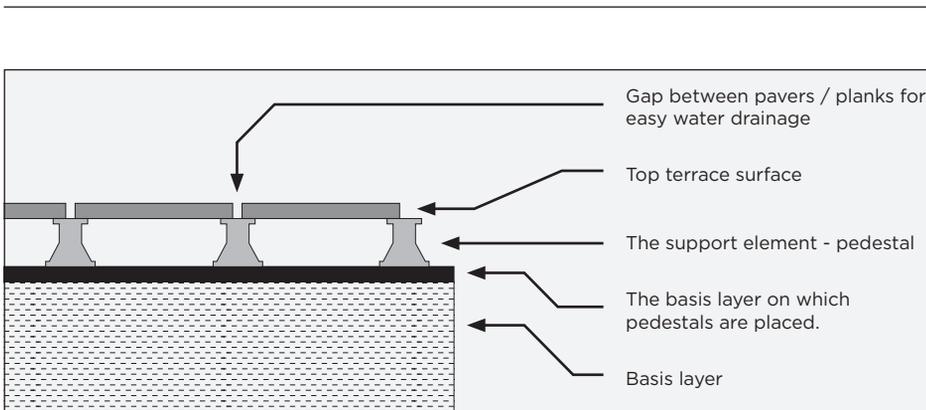

The assembly method allows for quick and easy replacement of damaged pavers or planks without the need for complex construction work.

Raised floor pedestal terraces offer the option to cover the vertical edges of the terrace.

This solution works for both paver terraces and those using wood or WPC planks. For paver terraces, simply use vertical edge mounting clips to achieve a clean and aesthetically pleasing vertical edge finish.

Scheme of pedestals raised floor terrace

The pedestals can be used under:

ADJUSTABLE PEDESTAL SYSTEM

STANDARD Series

Versatile and durable for all floating decks with pedestals

- **Self leveling head** - Automatically slope compensation from 0 to 7%
- **Most popular height range** - Height adjustment range

Give your customers extra **peace of mind** with the latest **Unilock DriveGrid system**, powered by Tensar's new H-Series range.

A paver driveway installed with Unilock DriveGrid System, will be stronger and less expensive too. This new geogrid follows extensive years of research and development by Tensar

Supported by its own Environmental Product Declaration (EPD), Unilock DriveGrid's new H-Series range has been developed specifically to support sustainable product specifications.

As with our other Next Generation products, Unilock DriveGrid can reduce initial and lifecycle costs, reduce construction time and provide sustainability benefits on a project-by-project basis.

Now you can say GOOD BYE to rutting with Unilock Drive Grid!

**PROVEN
TECHNOLOGY**

**PROVEN
SAVINGS**

**PROVEN
SUCCESS**

Unilock DriveGrid is designed to work well with a broad range of aggregates and granular materials that can offer additional savings through lower cost aggregate options.

Find out more on Unilock DriveGrid and see how we can save you time and cost on your next project!

Visit [UNILOCK.COM](https://www.unilock.com)

INSTALLATION GUIDE

Unilock DriveGrid™ is used to minimize aggregate fill requirements, reduce or eliminate undercut, improve compaction, build construction platforms, and extend service life. These features depend on proper installation.

1. STORAGE

Store Unilock DriveGrid rolls in a manner that prevents excessive mud, wet concrete, epoxy, or other deleterious materials from coming into contact with the geogrid. Store geogrids above -20° F (-29°C) and avoid handling below 14° F (-10°C). Unilock DriveGrid may be stored uncovered for up to six months in direct exposure to sunlight without any loss in certifiable structural properties (contact Unilock if longer exposure is anticipated).

2. PREPARING THE SITE

- Clear, grub and excavate (if necessary) to the design subgrade elevation, stripping topsoil, deleterious debris and unsuitable material from the site.
- Smooth grade and compact the soils using appropriate compaction equipment. Grade or crown the surface for positive drainage away from the construction zone.
- Place the rolls of Unilock DriveGrid in position, cut the roll bands and manually unroll the material over the prepared surface. The prepared surface may be the subgrade, subbase, or base elevation depending on the application. Unilock DriveGrid can be installed directly on the subgrade and no granular fill needs to be placed first.

SAFETY - Appropriate personal protective equipment should always be worn when handling, installing, and cutting Unilock DriveGrid. This may include hearing and eye protection, protective gloves, and long shirt sleeves and pants.

3. PLACING AND OVERLAPPING

- Unroll the geogrid in the direction of travel so that the roll is parallel with traffic patterns. Adjacent geogrid rolls should be shingled in the intended direction of aggregate spread.
- Cut and overlap the geogrid to accommodate curves. Cutting may be done with sharp shears, a knife-like implement or handheld power (e.g., "cutoff") saws. Cut grid to conform to manhole covers and other immovable protrusions.
- If a geotextile is required, it should be placed first with the geogrid immediately on top. Alternatively, Tensar FilterGrid™ (geogrid/geotextile composite) should be considered to speed installation.
- Overlap amount as required by the project documents, or as recommended in the table below.

Summary of DriveGrid Installation Parameters

Subgrade Strength	Clear all vegetation	Geogrid Overlap ¹	Direct Traffic ²
CBR ≤1	If Possible	3ft	No
1 < CBR < 4	Yes	2ft	No
4 ≤ CBR	Yes	1ft	Yes

1. Nylon zip ties may be helpful to maintain overlap when CBR ≤ 0.5%
2. Rubber tire equipment only
3. A separation geotextile should be considered when separation criteria are not met, or subgrade and aggregate gradations are unknown, but of concern
4. FilterGrid should be considered to accelerate geotextile installation or when subgrade is so soft that placing the geotextile is difficult

PRODUCT ATTRIBUTES

Structure	A Stiff, geocellular confinement system for soil reinforcement and load distribution.
Material	Made of 100% recycled low density polyethylene (LDPE) plastic. Stiff, yet flexible, even at low temperatures (does not become brittle). Long lasting, durable and environmentally friendly. Resistant to biological, chemical and UV degradation.
Performance	Creates a revolutionary Reinforced Soil Structure (RSS) with high tensile and compressive strength to maximize the performance of pavement structures. Extremely permeable; great for permeable pavements. 10 year product guarantee.
Construction	Lightweight and easy to handle. Simple and quick installation. Allows for easy repairs / adjustments after installation.

TECHNICAL INFORMATION

- Conforms to:
- DIN 38412 - Neutral for the environment, lifespan higher than 10 years
 - DIN 4102 - Approval emergency access routes, fire resistance
 - DIN 1072 - Approval for 20 tonne axle load, driveways, road extensions, bridges
 - DIN IN ISO 124 and B125 - Approval for car parks, access roads & storage areas

Maximum Load Capacity = 1,000 tonnes / m² (filled)
 Temperature Range = -35°C to 85°C (-31°F to 185 °F)
 Tile Wall Thickness = 3 mm (for GF50, GF40 & GF30)
 Performance Design Life = >100 years

ENVIRONMENTAL INFORMATION

- Made from 100% recycled plastic
- Recyclable

Notes: Engineering services are available for site-specific designs and drawings. For more information or for custom options, please contact your Unilock Territory Manager or call 1-800-UNILOCK.

APPLICATIONS

Pavement Structure Reinforcement

Under pavers, on subgrade for improvement, multi-layers for maximum performance and durability, conventional and permeable pavements, driveways, patios, walkways, pool decks, roof decks, over parking garages, trails and paths.

Pavement Transitions

Pavers to asphalt, pavers to concrete, driveways to garage, around catch basins and maintenance holes, over culverts.

Access Roads

Emergency and fire access, temporary construction access, grassed permeable pavers.

Foundation Support

Retaining wall levelling pads, outdoor kitchens, barbecues and fireplaces.

Low Impact Development (LID)

Permeable pavers with water storage in the pavement structure.

***Things to know:**

Handling and installation - Tiles are installed by laying on the ground and connecting them together with the built-in male and female connectors. Tiles may be driven on while empty for temporary applications. Tiles should be filled and compacted for maximum strength and load distribution.

CLEANERS & SEALERS

UNICARE™ NATURAL STONE ACIDCLEAN™

1L and 5L

Removal of:

- Cement Staining
- Efflorescence
- Iron Oxide (Rust)
- Cement mortar
- Grout

Note: Never use hydrochloric or sulphuric acid based products. **ONLY FOR ACID RESISTANT NATURAL STONE.** Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. Coverage: 10-50 M²/L depending on dilution.

UNICARE™ NATURAL POWERCLEAN™

1L and 5L

Removal of:

- Oil & Grease
- Food Stains
- General Dirt & Mud
- Light cement contamination (on acid sensitive surfaces)
- Sap & certain plant stains

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. For Natural Stone only. Coverage: 10-32 M²/L depending on dilution.

UNICARE™ BIOCLEAN™

1L and 5L

Removal of:

- Black spot algae
- Green algae
- Plant stains from leaves, wood, trees, berries & flowers
- Organic staining from bark & compost
- Coloured stains from food spillages, tea, coffee and wine

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. For Natural Stone only. Coverage: 4-8 M²/L depending on dilution.

UNICARE™ NATURAL STONE MATTE SEALER

1L and 5L

For Porous Stones - Natural Stone only

- No change of colour
- No surface coating, sheen or shine at all
- Riven Sandstone & Smooth Sandstone

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. Coverage: 6 M²/L depending on dilution.

UNICARE™ NATURAL STONE COLOUR ENHANCER SEALER

1L and 5L

Colour Enhancement For Porous Stones (for Natural Stone only)

- No surface coating, sheen or shine
- Breathable
- Lasts several years
- Easy to apply

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS. Coverage: 6 M²/L depending on dilution.

ALLIANCE GATOR CLEAN PAVER SHAMPOO

Gator Clean Shampoo removes ground-in dirt from the surface of concrete pavers and natural stones. It will make the pavers, patio slabs, walls & natural stones look clean and vibrant. Applying Gator Clean Shampoo before a sealer application will assure you of a deeper penetration into the cleaned surface. 1 gal. covers up to 375 sq. ft. Coverage will depend on joint width and surface porosity. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

ALLIANCE GATOR CLEAN EFFLORESCENCE & SLURRY REMOVER

Gator Efflorescence Cleaner will remove any efflorescence stains trapped in the concrete pavers and natural stone pores. It will make the pavers look more clean and vibrant without discolouring or damaging the paver surface. This efflorescence cleaning is a necessary step before a sealer is applied. The sealer will be able to get a deeper penetration into the now-clean pores. Approximate coverage (diluted) is 200 sq. ft. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

* ALWAYS DILUTE. ALWAYS TEST. Product can discolour pavers. Read directions carefully.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

ALLIANCE GATOR NATURAL STONE FINISH + COLOUR ENHANCER - ZERO GLOSS

Gator Seal for Natural Stone is made of silicone based polymers. This sealer penetrates deep into the natural stone thus reducing the oil and dirt penetration, as well as protecting them from the corrosion of de-icing salt. Approximate coverage 200 - 400 sq. ft. per gallon, depending on stone porosity and other factors. Available in 1 gal. & 5 gal.; 4 units of 1 gal./case, 24 cases/pallet; 48 units of 5 gal./pallet.

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

ADHESIVE / EDGING / TURF

ALLIANCE GATOR BLOCK POLYURETHANE XP XTRA PERFORMANCE ADHESIVE

Gator Block XP Adhesive is one of the strongest polyurethane adhesives on the market. It is especially formulated for bonding concrete, natural stones, blocks, bricks and pavers. It is intended to provide a permanent bond to approved materials and can be used on dry or damp surfaces.

Approximate coverage 31 ft per 10oz. / 86 ft per 28oz.; 12 units/case in box sizes.

ALLIANCE GATOR XTURF CLASSIC BLEND **NEW**

GATOR XTURF CLASSIC BLEND artificial turf becomes the ideal product for playground and pet surfaces where esthetics are a must. GATOR XTURF CLASSIC BLEND for residential application offers an exceptional blend of natural field with up to three-color blend called Gator Forest Green and Gator Lime Green will be guaranteed to enhance your property. The W-shape of the blades will keep the surface cooler. GATOR XTURF CLASSIC BLEND is free from heavy metals and harmful substances and has a high fire resistance level, meeting the requirements of both indoor and outdoor applications. GATOR XTURF CLASSIC BLEND replaces your natural grass for playground and pet surfaces with moderate traffic, low maintenance.

Packaging: 7.5 x 25' = 95 lb / 43 kg 15 x 33' = 251 lb / 114 kg
7.5 x 50' = 190 lb / 86 kg 15' x 100' = 760 lb / 344 kg

ALLIANCE GATOR XTURF PREMIUM BLEND **NEW**

GATOR XTURF PREMIUM BLEND artificial turf is the ideal replacement of the natural grass for residential landscaping, heavy-traffic commercial and sports surfaces. GATOR XTURF PREMIUM BLEND is a high-end artificial turf with natural colors blended up to three-color blend called Gator Forest Green and Gator Lime Green soft and fine yarn. The C-shaped blades are durable and also prevent the turf from matting under heavy use. With great water permeability, GATOR XTURF PREMIUM BLEND residential and commercial grass can alleviate the problem of rainwater accumulation quickly. GATOR XTURF PREMIUM BLEND synthetic turfs are free from heavy metals and harmful substances and has a high fire resistance level, meeting the requirements of both indoor and outdoor applications.

Packaging: 7.5 x 25' = 144 lb / 65 kg 15 x 33' = 381 lb / 173 kg
7.5 x 50' = 289 lb / 131 kg 15 x 100' = 1,095 lb / 497 kg

ALLIANCE GATOR XTURF PUTTING GREEN BLEND **NEW**

GATOR XTURF PUTTING GREEN BLEND is as close to a real golf course green and will transform your home backyard, meeting the needs of beginners and professionals. GATOR XTURF PUTTING GREEN BLEND has a high level of evenness that could guarantee the speed and trajectory of the golf ball.

GATOR XTURF PUTTING GREEN BLEND is available in one color Gator Summer Green.

Packaging: 7.5 x 25' = 109 lb / 49 kg
15 X 25" = 218 lb / 99kg

ALLIANCE GATOR XTURF INFILL SAND BEIGE AND GREEN **NEW**

GATOR XTURF INFILL SAND GATOR BEIGE is cost effective infill for GATOR XTURF. It is a natural sand optimized for perfect drainage of artificial turf. It is used as primarily infill to weight down artificial turf, providing stability, and cooling the turf. GATOR XTURF INFILL SAND GATOR BEIGE and GREEN surround individual grass blades ensuring that each blade has support to stand upright and maintain appearance of the turf, while offering superior drainage capability. GATOR XTURF INFILL SAND GATOR BEIGE prevent unsightly wrinkles / ripples while extending the turf's life by protecting the backing of the artificial turf.

GATOR XTURF INFILL SAND GATOR GREEN is a high-quality product made of sub round ceramic-colored coated quartz granules. It is used as a primary infill to weigh down artificial turf, providing stability, UV protection and cooling for the turf.

Packaging: 50 lb bags / 22.7 kg

ALLIANCE GATOR XTURF INFILL SAND GATOR ZEO-WHITE **NEW**

GATOR XTURF INFILL SAND GATOR ZEO-WHITE is 100% zeolite which is composed of various microporous minerals. GATOR XTURF INFILL SAND GATOR ZEO-WHITE is a mineral with a crystalline solid structure made of silicon, aluminum and oxygen that forms a framework with cavities and channels inside where cations, water, and small molecules may reside. GATOR XTURF INFILL SAND GATOR ZEO-WHITE is a powerful absorbent, and this product which helps prevent, reduce and control foul odors.

GATOR XTURF INFILL SAND GATOR ZEO-WHITE will help prevent your artificial turf from overheating by absorbing the heat from the sunlight resulting in the transpiration of water to the atmosphere. This process significantly lowers the temperature of the artificial grass surface. This quality makes GATOR XTURF INFILL SAND GATOR ZEO-WHITE a great second infill layer to add on the top of our primarily infill such as GATOR XTURF INFILL SAND GATOR GREEN/BEIGE.

Packaging: 40 lb bags / 18.1 kg

ALLIANCE GATOR XTURF NAILS **NEW**

Use GATOR XTURF NAILS to hold the GATOR XTURF and SEAM TAPE in place. Available in 6" and 10" Nails.

Packaging: 6" = 50 lb / 22.7 kg (730-740 nails)
10" = 50 lb / 22.7 kg (250-260 nails)

ALLIANCE GATOR XTURF SEAM TAPE **NEW**

GATOR XTURF SEAM TAPE is offered in two roll sizes of 1' x 100' and 1' x 300' made from high-quality Polypropylene material. It has a laminated bottom, which acts as a barrier against water absorption from the foundation gravel. It has a dotted line on the top section, which acts as a guide during GATOR XTURF installation.

Packaging: 1 x 100' (30cm x 30.5m)
1 x 300' (30cm x 91.4m)

SANDS

**ALLIANCE GATOR NITRO JOINT SAND** - FOR JOINTS UP TO 2" MAXIMUM

For outdoor pavers and slabs. 25% faster set time. Sets above 37° F. Ideal for use with Natural Stone, Porcelain Tile, wet cast and concrete pavers and slab installations. 5 year warranty. Only warranted for Porcelain Tile if installed with the Gator Tile System. Best for Patios, Pool Decks and Walkways. Ready to use, no mixing. Works above 3° C.

Four colours - Beige, Black, Grey and Silver

Helps prevent weed sprouting, damages caused by insects, erosion due to climatic conditions.

Packaging: 40 lb pail / 18.1 kg pail
48 pails per pallet

**ALLIANCE GATOR NITRO X FINE JOINT SAND** - FOR JOINTS UP TO 2" MAXIMUM **NEW**

For outdoor pavers and slabs. 25% faster set time. Sets above 37° F. Ideal for use with Natural Stone, Porcelain Tile, wet cast and concrete pavers and slab installations. 5 year warranty. Fine gradation jointing sand, low permeability, strength from top to bottom. Apply rain or shine. Works best above 3° C.

Four colours - Black, Gunmetal, Platinum, Taupe, Vanilla.

Helps prevent weed sprouting, damages caused by insects, erosion due to climatic conditions.

Example: 22 sq.ft / 27.5 lb. pail (Town Hall)

Packaging: 27.5 lb pail / 12.5 kg pail
48 pails per pallet

**ALLIANCE GATOR G2 SUPER SAND (Intelligent Polymeric Sand)** - FOR JOINTS UP TO 2" MAXIMUM

Rain safe after 15 minutes; sets above 32° F/0° C but will vary depending on drainage, bedding material, etc. Dust free and haze free. No blower is needed, requires only one watering. 15 year warranty.

Two colours - Beige and Slate Grey

Packaging - 50 lb bags / 22.7kg bags; 70 bags/skid

IDEAL FOR:

- Residential applications
- Concrete paver, wet cast products
- Sloping areas, pool surroundings, patios, walkways, driveways and more

**ALLIANCE GATOR G2 Maxx Sand (Intelligent Polymeric Sand)** - FOR JOINTS UP TO 4" MAXIMUM

Rain safe after 15 minutes; sets above 32° F/0° C but will vary depending on drainage, bedding material, etc. Best suited for poor drainage areas. Dust free and haze free. No blower is needed, requires only one watering. 15 year warranty.

Four colours - Beige, Slate Grey, Black Diamond and Ivory.

Packaging - 50lb bags / 22.7 kg bags; 70 bags/skid

IDEAL FOR:

- Residential & Commercial applications
- Concrete paver, wet cast products
- Sloping areas, pool surroundings, patios, walkways, driveways and more

**ALLIANCE GATOR SUPER SAND** - FOR JOINTS UP TO 1" MAXIMUM

Super Sand is a unique mixture of polymer binders and calibrated sand available in Beige and Grey. The installation of Super Sand Bond is almost identical to using regular paver joint sand except for the application of water. Once Supersand Bond sets, it becomes very firm and locks between the paver joints while still retaining flexibility and providing a long lasting, durable jointing material. Super Sand Bond is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements etc. Rain safe after 1 hour; sets above 32° F/0° C. 15 year warranty.

Two colours: Beige, Slate Grey

Approximate Coverage: 60 - 85 sqft per 50 lb bag. Available in 50 lb bags/70 bags/pallet.

Note: Extra care must be exercised when using on Copthorne, Courtstone, Richcliff, Town Hall and Umbriano products. Not suitable for use with Il Campo and Series.

**ALLIANCE GATOR MAXX SAND** - FOR JOINTS UP TO 2" MAXIMUM

Gator Maxx Sand is a unique mixture of polymer binders and calibrated sand available in Beige and Grey. The installation of Gator Maxx Sand is almost identical to using regular paver joint sand except for the application of water. Once Gator Maxx Sand sets, it becomes very firm and locks between the paver joints while still retaining flexibility and providing a long lasting, durable jointing material. Gator Maxx Sand is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements etc. Rain safe after 1 hour; sets above 32° F/0° C. 15 year warranty.

Two colours: Beige, Slate Grey

Approximate Coverage: 60 - 85 sqft per 50 lb bag. Available in 50 lb bags/70 bags/pallet.

Note: Extra care must be exercised when using on Copthorne, Courtstone, Richcliff, Town Hall, and Umbriano products. Not suitable for use with Il Campo and Series.

**ALLIANCE GATOR DUST**

For Residential applications. For natural stone joints 1/2" to 6". It's ideal for pedestrian patios, walkways, pool decks and many more scenarios. Sets above 59° F (15° C). Fast setting min. 24 hrs without rain. Pedestrian application only. Helps prevent weed sprouting, damages caused by insects, erosion due to climatic conditions. Beige and Grey

Packaging - 50 lb bags / 22.7 kg bags, 70 units per pallet

Pallets can be stored outside if covered.

SANDS / ACCESSORIES / EDGING

ALLIANCE EUROSTONE BOND - THE COURSTONE® SAND

FEATURES: Great for cobblestone and natural stone joints up to 1.5". Sets at above 32° F (0° C). Fast setting: Drainage base systems, min. 1 hr. without rain. Non-drainage base systems, min. of 24 hrs. without rain. More rigid and water resistant. Helps prevent weed sprouting, damages caused by insects and erosion due to climatic conditions. In vehicular application stone must interlock or lay in a concrete bed. Available in Grey.

Packaging - 50 lb (22.7 kg)

56 units per pallet

Pallets can be stored outside if covered.

ALLIANCE GATOR AQUA ROCK - FOR PERMEABLE PAVERS

FEATURES: For Residential and Commercial applications. For permeable paver joints. It's ideal for driveways, parking lots, walkways, drainage applications, bedding and jointing material and many more scenarios. Helps prevent erosion due to climatic conditions. Use as bedding and jointing material. Graded to meet ASTM No. 9. High strength granite stone for long-term use. Helps collect roof and surface water run-off. Reduction of storm water rate. Long-term high infiltration performance.

Packaging - 50 lb bags / 22.7 kg bags

56 units per pallet

UNILOCK KILN-DRIED REGULAR SWEEPING SAND

Kiln dried and angular shaped in order to flow easily and stay in place.

Packaging - 66 lb/bag

50 Bags / Skid

ALLIANCE GATOR BASE

FEATURES: For Pedestrian use only. Replacement base technology, GATOR Base eliminates the need for crushed stone underneath a pedestrian paver project.

GATOR Base is a unique evolution in base technology. Evacuates water through channels along a slope.

Manufactured using lightweight high-density polypropylene. Environmentally friendly and 100% recyclable.

Extremely durable, will not degrade in the ground. Designed with LOCK-N-GO tongue and groove system. Packaging - 10 units per pack, 12 packs per box, 120 units per pallet

ALLIANCE GATOR SPACERS

FEATURES: Provides uniform spacing and unparalleled horizontal and vertical stability to the system. GATOR Block Bond XP penetrates into the rivet holes, adhering the Porcelain tile to the GATOR Spacer, then hardens. This allows the tile to minimize any horizontal or vertical movements.

Available in 3 sizes: Joint widths of 1/8", 3/16" & 1/4"

Packaging: 50 units per pack, 12 packs per box, 144 units per pallet

ALLIANCE GATOR BASE SCREWS

FEATURES: Fastening Gator Edge with the Gator Base Screw through the Gator Base reinforces the outside perimeter, creating a strong lateral support. Gator Base Screws are a required component on any Gator Base install. When using any of the Gator edging on the Gator Base, they must be fastened with Gator Screws only.

Packaging: 50 units per pack, 20 packs per box

ALLIANCE GATOR XTREME EDGE

FEATURES: Gator Xtreme Edge is the ultimate fiber-reinforced structural edge which creates a strong and economical edging solution for any hardscape project. Suitable for any traditional, permeable, Gator Base, or overlay application. Offers permanent continuous lateral support for pavers, slabs, natural and wet cast stone.

Packaging: 50 lb bag / 22.7 kg bag

56 bags / skid

ALLIANCE GATOR EDGE RIGID & FLEX

Gator Edge Products are easy to use and quick to install. An excellence choice, it offers great lateral support and makes definition easier for alleys, driveways or sidewalks. They are made with 100% polypropylene or polyethylene for strength and flexibility.

Packaging: 24 pcs/bdl

28 bdls/skid, 1 skid = 5,376 lin.ft.

PERMA PAVER® CONCRETE EDGING

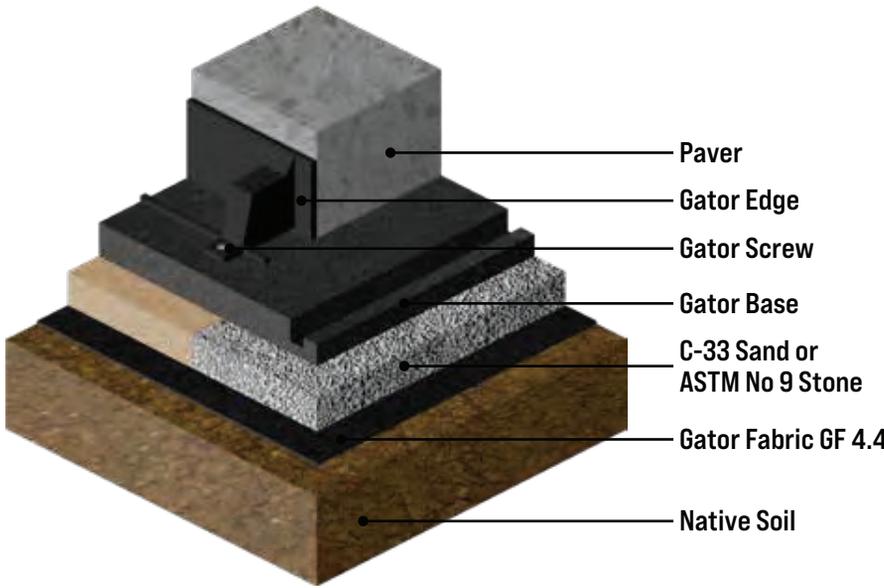

FEATURES: Perma Paver Edging is 40% more permeable and over 700% more flexible than concrete. Perma Paver Edging uses non-porous aggregates (sand and gravel) so the aggregate will not absorb or retain water like limestone aggregates found in most concretes and mortars which retain water like a sponge, greatly increasing the chance of failure. It also uses a proprietary blend of additives, making it much more permeable than concrete or mortar; allowing water to pass through to avoid freezing in cold climates and not retain moisture in humid warm climates. Perma Paver Edging also contains high strength fibers to prevent separation cracks.

Packaging: 50 lb bag

56 bags per skid

GATOR BASE SYSTEM

Gator Base System

STEP 1 • EXCAVATION FOR THE GATOR BASE INSTALLATION

The total depth required will be determined by adding the thickness of the sand or chip setting bed (3/4" [19 mm]), GATOR BASE (3/4" [19 mm]), and thickness of the paver, slab, stone, or porcelain tile. Excavation depth is approximately 4" for a 2 3/8" [60 mm] concrete paver. Excavate 6" (15 cm) wider than the perimeter of the paved surface or 12" wider (30 cm) when building a seating wall or fire pit.

STEP 2 • LEVELING AND COMPACTING OF THE SOIL

The bottom of the excavated area should be uniform and smooth (+/- 3/8" [10 mm] in 10') and slope in the same direction as the finished paver surface. Compact the soil using a vibrating plate or hand tamper in confined areas.

STEP 3 • ADD GATOR FABRIC GF4.4 AND INSTALL SETTING BED

Cover the bottom and sides of the excavated area with Gator Fabric GF4.4. Spread an even layer of sand (ASTM C33 Concrete Sand) or chip (ASTM No. 9 Stone) in a 3/4" [19 mm] thick layer over the Gator Fabric GF4.4. No compaction is needed for the chip stone. However, the sand-setting bed should be compacted using a hand tamper or vibrating plate. It will help to moisten the sand before compaction. The surface should be smooth, the finished paver surface will mirror the grade set in this step.

STEP 4 • INSTALL THE GATOR BASE

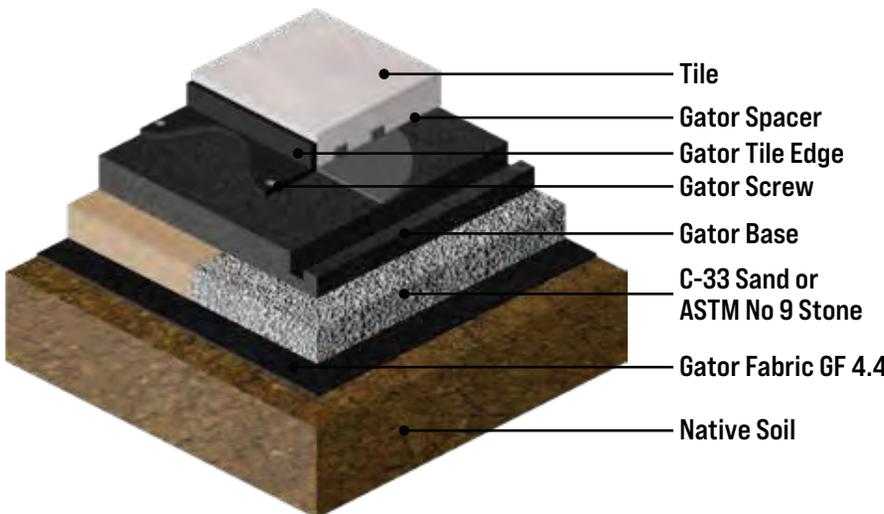

Cover the area with the GATOR BASE panels, 6" (15 cm) wider than the finished paver edge or 12" (30 cm) for a seating wall or fire pit. Lay the GATOR BASE units in an alternating (staggered) pattern - if the Gator Faces line up, the interlocking edges will align perfectly. Gator Base can easily be cut to size using a utility knife.

STEP 5 • INSTALL PAVERS, BLOCKS AND GATOR EDGE

Place the pavers or blocks directly on the GATOR BASE. Adding a 1/2" (13 mm) of bedding sand onto the surface of the GATOR BASE is also an accepted method for non-uniform thickness stone. Install the Gator Edge on the GATOR BASE, firmly against the pavers or blocks. Use a Gator Base Screw every second edging hole to maximize the lateral support provided by the Gator Edge.

STEP 6 • APPLY GATOR MAXX G2 TO PAVER JOINTS

Gator Tile System

FOLLOW STEPS 1 TO 4 OF GATOR BASE SYSTEM

STEP 5 • INSTALL GATOR SPACER, GATOR XP GLUE AND TILE

The installation of porcelain tile directly on top of the Gator Base using the GATOR SPACER to provide uniform spacing and unparallel stability. The GATOR SPACER has been designed to provide the right support, load transfer and a monolithic surface binding all units together with the help of the Gator XP Glue on every quadrants of the Gator Spacer.

STEP 6 • INSTALL GATOR TILE EDGE

Install the Gator Tile Edge on the GATOR BASE, firmly against the tiles. Use a Gator Base Screw every second edging hole to maximize the lateral support provided by the Gator Tile Edge.

STEP 7 • APPLY GATOR NITRO TO TILE JOINTS

Gator Base System

Gator Tile System
