U-CARA ALIGNMENT BAR:  
39" LENGTH - SOLD IN PACKS OF 10 PIECES

U-CARA RAILS:  
8' LENGTH - SOLD IN PACKS OF 10 PIECES

# U-Cara® Wall Mount System Installation

## Alignment Bar

- | 38-5/8" tall (up to 7 courses of 6" fascia panels)
- | Pre-punched to accommodate both 3" & 6" panels
- | Eliminates the need to measure for rail spacing
- | Speeds up installation
- | 10 per bundle

## Horizontal Rail

- | 8' long with pre-punched holes every 8"
- | Heavy duty galvanized steel
- | 10 per bundle

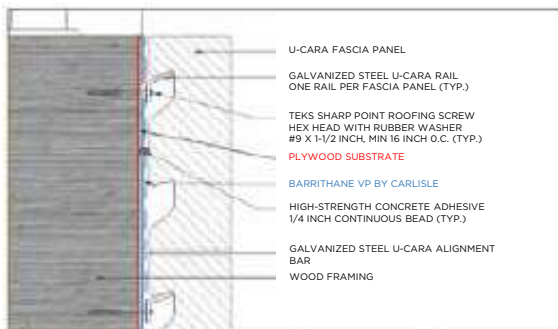

## U-Cara Fascia Panels

- | EnduraColor Technology
- | Available in 4 different finishes and several colors
- | Apply adhesive and hang on wall mount system

### Wood Substrate Application

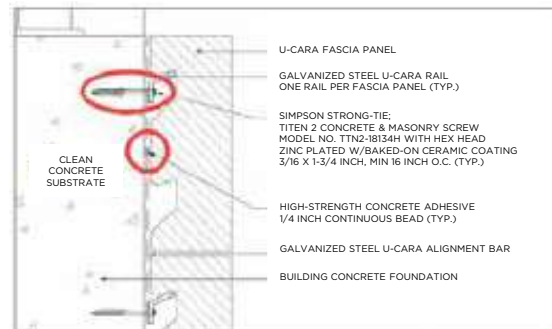

- Carlisle Barrithane VP**
- | Damp surface tolerant
  - | Immediately rain resistant
  - | Single coat application
  - | Apply as low as 15° F

- Teks Sharp Point Roofing Screw #12 x 1-1/2"**
- | Hex head
  - | Rubber washer
  - | Corrosion resistant coating

### Concrete Substrate Application

- Simpson Strong-Tie Titen 2 Hex Head 3/16" x 1-3/4"**
- | Improved thread design
  - | Increased load capacity
  - | Reduced snapping
  - | 450+ pound tension load
  - | 275+ pound shear load

# U-Cara® Wall Mount System Installation

**Step 1:** Determine finished top height, mark with chalk line. Align orange painted end of alignment bar with chalk line.

Alignment bars should be placed 16" in from end of horizontal rail, and every 32".

**Step 2:** Fasten both horizontal rail and alignment bars to substrate at points 1, 2, and 3; ensuring the rail is level.

The first four screws are the most important, as they will establish your grid pattern for all your horizontal rails in this section.

**Step 3:** Fasten the bottom horizontal rail and alignment bar at point 4; use a level or a square to ensure alignment bar is plumb

You have now established your grid pattern for the rest of your horizontal rails in this section.

**Step 4:** Fasten the bottom horizontal rail and alignment bars at points 5 and 6.

**Step 5:** Fasten remaining horizontal rails.

All horizontal rail should be fastened to substrate every 16" and on both ends.

**FIRE PIT INSERTS SOLD SEPARATELY**

### FIRE PIT WARNING

Wood-burning fire pits must be lined with a proper metal insert or refractory (fire-rated) brick to protect the concrete components from extreme exposure to heat. Extreme heat on a concrete surface may affect the structural integrity of the concrete and can be dangerous. The floor of the fire pit should always be constructed using refractory brick or a sand bed. For your safety, always use a spark screen over the fire.

Notes: **SOLD IN FULL BUNDLES ONLY.** All measurements are nominal. Square fire pit can be created by purchasing a square insert and one pallet of corner wall product. Contact Unilock for more information.

### GUARANTEE

The standard Unilock guarantee applies to the units used to construct Unilock Elements. (See Unilock literature for details.) Third party grills and fireboxes carry their respective manufacturer's warranty, and may change without notice.

**Note:** Unilock reserves the right to change model designs, accessories and colors without notice. Unilock will not be responsible for improper use or handling that results in property damage. Some models may not be exactly as shown. Fireplaces come complete with UL- approved stainless steel fireboxes. Check local building codes and regulations prior to ordering and installing Unilock Elements.

NEW from Unilock, the SkyView Roof Deck System is a comprehensive product lineup that includes adjustable pedestals, invisible wind uplift solutions, roof deck slabs, wood tile, and fiberglass grate. Together, these components offer unmatched flexibility, empowering designers to create elevated rooftop spaces that are visually stunning, durable and high-performing. The system's intuitive design also simplifies installation for contractors, ensuring efficiency without compromising quality. With SkyView, reimagine what's possible for roof deck design and construction.

## SKYVIEW PEDESTAL SYSTEM

Unilock SkyView Pedestals are patent pending, fully adjustable structural supports for elevating paving materials. Our pedestals ensure unmatched flexibility, ease of installation and durability.

- 1/2" and 1" Waffles available for low profile applications.
- 10" Cores and Collars available for taller applications up to 31".

## SKYVIEW GRATE

When this 48 x 48" fiberglass grate is placed on SkyView Pedestals, it creates a stable surface for installing smaller paver units on an elevated roof deck.

## SKYVIEW WIND UPLIFT SYSTEM

When the below components are combined with the SkyView Pedestal System, they create a rafted paving surface with an invisible tie-down mechanism that resists wind uplift pressures without compromising project aesthetics.

### 1 | Wind Uplift Slabs

24 x 24" slabs featuring a kerfed undercut that spans the length of two opposing sides.

### 2 | Wind Uplift Kit

This 3-part kit is easily added to SkyView Pedestals to form a tie-down mechanism that works seamlessly with our Wind Uplift Slabs.

## GATOR GRID 30-30

RS-FAB070 4' x 50' / 16 rolls per box  
RS-FAB071 6' x 50' / 20 rolls per pallet

Gator Grid 30-30, a biaxial geogrid, provides strength, longevity, excellent stress transfer and prevents failure to the internal structure of landing areas, retaining walls and steep slopes. It has a high molecular weight as well as high-tenacity polyester yards which are woven in tension and finished with a PVC coating.

## GATOR FABRIC NON-WOVEN 3.5

RS-FAB038 4' x 100' / 4 roll package  
RS-FAB040 6' x 100' / 12 roll package

Gator Fabric Non-Woven 3.5 geotextile is ideal for drainage, filtration and will allow water flow in a paver or retaining wall application. It is designed for soil separation for added stability, has high strength and is dimensionally stable.

## GATOR FABRIC WOVEN 5

RS-FAB049 4' x 100' / 4 roll package  
RS-FAB052 6.25' x 300' / 12 roll package

Gator Fabric Woven 5 is a woven geotextile made from polypropylene yarns and can achieve higher tensile strength at low elongation. It is an excellent heavy-loading geotextile, ideal for driveways, alleyways, pathways and retaining walls.

# Polysand Best Practices

- Ensure that paver surface has **proper drainage runoff** (Min 1" over 8'). Finished paver height should always be higher than grade to allow proper surface drainage.
- **Do not set pavers in limestone screenings.** This product holds moisture and does not meet the gradation, drainage qualities or strength of coarse concrete sand.
- Make sure pavers are **clean of all construction dust.** Residual construction dust will haze pavers!
- **Compact pavers** into setting bed to create proper interlock.
- Read and review all polysand manufacturers methods of application. **(Read Directions)**
- **Don't rush polysand installation.**
- Paver area must be completely dry.
- Lay bags of polysand over paver area. **Stage bags** in areas of coverage. Example: one bag for 60 square feet.
- **Do not over sweep sand.** Sweep sand back and forth within coverage area to fill paver joints.
- Compact sand into joints. This is a must in achieving proper density of the sand joint (repeat 3 times). Compaction is critical to assuring sand strength.
- Do not fill sand above the chamfer of paver. Sand should sit 1/8" below bottom of chamfer.
- Use a fine-bristle broom to **remove any excess sand from the paver surface.**
- Use a **leaf blower** remove any sand or binder residue.
- **Review all watering directions (each manufacturer has different watering instructions.) This is VERY IMPORTANT!**
- Always start watering at the **bottom of the slope.**
- Always start watering in **controlled areas** per manufacturers recommendations. Example: complete watering in 200 sq. ft. area then move on to the next 200 sq. ft. and repeat.
- During final watering of poly sand, **clean surface by removing excess water** with leaf blower or squeegee depending on paver surface texture. This will remove any leftover binder residue or sand.
- Final thoughts – Always be aware of the weather when installing poly sand. **(Temperature and setting time ratings differ between products.)**
- Refer to all manufacturers websites for installation videos.

# Sealer Best Practices

---

- The paver surface should be **clean** and free from oil, dirt, dust and any loose material. This ensures a uniform result and allows the sealer to better penetrate the surface.
- The pavers should be **free of any visible efflorescence**.
- If pavers have been sealed before, make sure to resealed with compatible product.
- **Surface must be dry** (48 hours without precipitation) and warm to the touch (morning).
- Joint sand must also be dry.
- Make sure lawn sprinklers are shut off.
- Best air temperature is between **50 degrees to 80 degrees** with no rain forecasted for the next 24 hours.
- It is best to apply product under constant weather conditions and use the **same application method from start to finish**.
- The paver joints should be completely filled with dry correctly-graded joint sand. The top level should not exceed the bottom of the chamfer or **1/8" below** the surface on the non-beveled or tumbled paver surface.
- **Always test the product** on a small hidden area to ensure the results will meet your expectations.
- Always show homeowners samples to ensure expectations.

**At this point read all sealer instructions and determine the best sealer for your desired goal. Do you want to retain the original look, enhance the color, or stabilize the sand joint?**

- **Read application information as each sealer can be applied differently.**
- **Make sure you have the correct equipment based on type of sealer. Solvent based sealers need solvent resistant sprayers, watering cans or paint trays.** Water base sealers can be generally applied using plastic equipment. Example: solvent based sealers come in metal containers and water based sealers come in plastic containers.
- Care should be taken that no excess sealer material is pooled on the surface during application always back roll. When using solvent based sealers make sure roller is solvent resistant or for all paints. Foam rollers work best and are less likely to pull sand from the joints.
- Stabilizing sealers are generally sprayed or flood coated with a watering can, then back rolled.
- Acrylic non-stabilizing sealers can be sprayed, then back rolled or rolled on using a metal paint tray.
- **Send your most experienced worker to do sealing projects.**

## IMPORTANT NOTICE

**1. DO NOT USE** Polymeric Jointing Sand on the following products:      Series™      Il Campo®

If joint stabilization is required, use ordinary jointing sand and apply a stabilizing sealer. Contact your local Unilock office for recommended sealants and application specifics.

**2. EXTRA CARE** must be exercised when using Polymeric Sand on the following products:

Courtstone®      Copthorne®      Richcliff®      Town Hall®      Umbriano®

Polymeric Jointing Sand can be used on these products but the fine polymers and binders in Polymeric Jointing Sand have a natural tendency to adhere to the surface and therefore extra diligence must be taken to pre-clean the surface prior to "wetting the sand in" and squeegee off the surface post application. Failure to do so will result in a "whitish haze" on the surface that is difficult to remove.

**3. IMPORTANT COMPACTION NOTICE:** Always pre-compact the pavers WITHOUT SAND IN THE JOINTS. This will facilitate proper leveling. Polymeric sand can then be swept into the joints. Always use a compactor with a protective membrane attached to the bottom of the plate.

**Polymeric Jointing Sand, cleaners and sealers, must always be applied by a trained and experienced professional. Contact your local Unilock office for training and the most up-to-date best practices.**

**NOTICE:** Unilock does not accept any responsibility for damage to the surface caused by the improper application and use of polymeric sand, sealers or cleaners. Unilock will not accept responsibility for alternate suppliers of polymeric sand, jointing sand, cleaners and sealers.

## NATURAL STONE INSTALLATION GUIDELINES

A slurry coat, sometimes called a bond or milk sealer coat, is brushed on to the back of each natural stone unit prior to installation in order to limit moisture penetration, prevent staining and aid adhesion.

## OPTIMAL COLOR BLENDING INSTALLATION

Blending colors from multiple (3+) bundles is ideal for the optimal color installation. DO NOT LAY PALLET TO PALLET!

## UNILOCK PAVER PATTERNS

This Product Data Guide contains an extensive reference to patterns and designs. The purpose of these pattern swatches is to help the designer plan unique and exceptional designs. The percentages of products shown are based on the pattern and not on bundle configurations. In fact, there may be situations in which a pattern has been created with one particular size of stone, but that stone only comes packaged with two other sizes. This means that the designer will have to plan how the other components are used in the overall plan. This is usually accomplished by adding a border or an accent. As a result, overages or shortages may occur in certain patterns. The designer and/or installer of Unilock products accepts all responsibility for design and all associated costs incurred as a result of applying any of Unilock's suggested design patterns in a project. Please plan your project and review your order carefully prior to ordering.

## TRANSFERABLE LIFETIME GUARANTEE

Unilock provides a Transferable Lifetime Guarantee\* on the structural integrity of Unilock concrete paving stones and retaining wall units when used in residential applications. Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Color matching cannot be guaranteed and replacement labor is not included. Proof of purchase is required.

\*Transferable Lifetime Guarantee: Register your project within 60 days of your dated proof of purchase to ensure your Unilock Guarantee is fully transferable! Simply go online at [unilock.com](http://unilock.com) and follow instructions. Once processed, you will receive an original Transferable Warranty Certificate for your records.

## PRODUCT HANDLING WARNING

**Bundle Straps Under Tension - Use extreme caution when removing or handling straps.** Always wear gloves, goggles, safety footwear, and protective clothing when removing or handling straps. Failure to do so may result in serious bodily injury or loss of sight.

Cut all concrete products only in well ventilated areas. Inhalation of dust is a serious health risk. A "NIOSH" (US) or a "CSA" (CDN) approved respirator, safety goggles, hearing protectors, and gloves must be worn at all times. Always "wet-cut" or "wet grind" concrete products to minimize dust.

Do not stack bundled concrete products higher than 2 bundles high. Contents of the bundle may be unstable and subject to topple when stacked. Always use extreme caution and appropriate equipment when transporting or storing bundled concrete products. Failure to do so may result in serious bodily injury or death. Always obey gross vehicle weight (GVW) loading limitations and regulations.

Hazard Rating: Fire 0, Health 1, Reactivity 0. See MSDS Concrete Masonry (Pavers). Contact Unilock for complete sheet or view safety information at [Unilock.com](http://Unilock.com).

Unilock assumes no liability or responsibility for loss or damage, resulting from the improper use or handling of our products, or from failure to follow instructions, warnings, and/or advisories on the product label, and on the MSDS sheet.

# Terms and Conditions of Sale

---

1. All orders are accepted subject to prevailing state or other taxes, and subject to the cost of freight applying at the time of shipment.
2. The acceptance by the Seller of an order shall constitute a binding contract of purchase and sale in accordance with the terms set out in this agreement.
3. These terms and conditions together with the purchase order form and the complete contract, have no representatives, warranties, or conditions expressed or implied affecting this contract other than as contained herein.
4. All sales are made in accordance with the Seller's samples, which the Purchaser has seen and approved. No guarantee of exact color shades is made.
5. "F.O.B. Job-Site" means "delivered to curb line."
6. Use of any delivered materials by, or on behalf of the Purchaser, shall be deemed to constitute acceptance of the materials by the Purchaser.
7. Defective material in excess of the industry standard of 2% delivered to the Purchaser will be replaced free of charge if a claim is made within five days. Free replacement will be the extent of the Seller's warranty. Any such claim will not constitute a reason for delaying payment.
8. Unsuitable or unsatisfactory materials must be available for inspection by the Seller to entitle the Purchaser to any adjustment or credit.
9. No materials may be returned for credit except with the written consent of the Seller whether such materials were ordered in excess of the Purchaser's requirement, by mistake or otherwise.
10. Where the Seller agrees to accept the return of goods, these goods are subject to freight charges and a restocking charge of 20% of their value plus delivery. All goods must be returned in their original package and in selling condition.
11. All special orders will require a 50% deposit and must be shipped within 30 days of the receipt of the production date.
12. Seller does not accept responsibility for delays in deliveries due to fire, flood, strikes, or any other condition or contingencies beyond its control.
13. The Purchaser is responsible for installation of the materials on the job site and the Seller as no responsibilities in this regard.
14. All orders, other than "charge on account orders", must be paid by cash, certified check, or credit card before delivery can be scheduled.
15. All accounts are payable within thirty days from the date of invoice. After 30 days, interest will be charged at 1-1/2% per month calculated monthly on the balance owing at the beginning of the period. In default of payment of any part of any money due under this account, the whole amount remaining unpaid shall, at the option of the Seller, immediately become due and payable.
16. Excessive delays incurred on the delivery will be billed to the Purchaser at \$75 per hour. Delivery time in excess of one hour.
17. All loads must be strapped down before leaving our yard.
18. Title and ownership of the goods shall not pass to the purchaser until the entire amount owing, including interest, is paid in full.

## **LIMITED WARRANTY:**

Unilock's internal testing suggests that the SkyView wind uplift system can significantly reduce the likelihood of rooftop paver failure or damage due to strong wind conditions; EXCEPT AS EXPRESSLY PROVIDED HEREIN, UNILOCK MAKES NO REPRESENTATIONS OR WARRANTIES WHATSOEVER WITH RESPECT TO THE PRODUCTS, WHETHER EXPRESS OR IMPLIED. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, UNILOCK HEREBY DISCLAIMS ALL OTHER WARRANTIES, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. SPECIFICALLY, UNILOCK DOES NOT REPRESENT OR WARRANT THAT ITS ROOFTOP PEDESTAL SYSTEMS OR ITS ROOFTOP TILES, SLABS OR PAVERS WILL REMAIN IN PLACE IN ALL HIGH WIND CONDITIONS.

## **LIMITATION OF LIABILITY:**

EXCEPT AS OTHERWISE EXPRESSLY SET FORTH HEREIN, IN NO EVENT SHALL UNILOCK BE LIABLE TO BUYER FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, PUNITIVE, EXEMPLARY, TORT OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO ANY DAMAGES FOR BUSINESS INTERRUPTION OR THE LOSS OF REVENUES, PROFITS OR SAVINGS, WHETHER OR NOT SUCH DAMAGES WERE FORESEEN, UNFORESEEN OR FORESEEABLE, EVEN IF UNILOCK HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOTWITHSTANDING THE FOREGOING, IN THE EVENT THE TERMS OF THIS SECTION, OR ANY PART THEREOF, SHALL BE HELD BY A COURT OF COMPETENT JURISDICTION TO BE INVALID OR UNENFORCEABLE, UNILOCK'S TOTAL AGGREGATE LIABILITY TO BUYER WITH RESPECT TO THE PRODUCTS SHALL NOT EXCEED THE PURCHASE PRICE OF THE PRODUCTS GIVING RISE TO THE CLAIM. NOTWITHSTANDING THE FOREGOING, THIS SECTION SHALL NOT RELIEVE UNILOCK FROM LIABILITY FOR DAMAGES THAT RESULT FROM UNILOCK'S OWN GROSS NEGLIGENCE OR WILLFUL OR TORTIOUS ACTS.

# Unilock Finishes

When considering the finish, think about the look you are trying to achieve as well as practical performance. From traditional smooth and flagstone, to enhanced surfaces, modern granite looks and timeworn patina, Unilock offers it all.

**Smooth finish**

Sometimes, simple is best. A smooth surface suits contemporary styles and is available in a wide variety of shapes for paving and verticals.

**Flagstone finish**

Popular for centuries, a flagstone finish never fails to add warmth to outdoor spaces.

**ANTIQUED FINISH**

A variety of methods are used to achieve this distressed finish, but in every case, it lends a relaxed, rustic vibe.

**Timeworn**

Our exclusive Elegance line offers the look of centuries-old cobblestone, brick, and natural stone with unsurpassed product durability.

**BRUSHED FINISH**

Only Unilock offers Il Campo®, a unique surface enhanced with graphically interesting etched lines. This finish has long been a favorite of commercial designers.

**umbriano**

Umbriano is an exclusive finish only available from Unilock with color and granite particles that are randomly dispersed to achieve a unique mottled surface that is reminiscent of granite.

**EXPOSED GRANITE**

Granite, Quartz and Marble particles are embedded in the product's surface and then revealed using additional processing methods.

**Enhanced surface**

The surface of these products is enhanced using a special process to reveal a variety of distinctive colors and textures.
