

SIENA STONE[®]

REF: Detail_SienaStone_Concrete Pipe Outlet Through Face of Wall

CONCRETE PIPE OUTLET THROUGH WALL DETAIL

Note:
detail assumes:

1. Pipe has been designed to withstand weight of wall above it.
2. Suitable concrete fill material in complete contact with pipe - supporting unit above
3. No excessive settlement of the wall is anticipated which may alter pipe alignment.

Note:

Poor site conditions can affect the stability of the structure. Consult a qualified professional engineer to determine site specific construction details.
