FCFT PER LAYER	7.75	7.75
FCFT PER UNIT	1.94	1.94
UNITS PER BUNDLE	12	12
UNITS PER LAYER	4	4
LBS PER BUNDLE	3,086.45	3,086.45
LBS PER LAYER	1,028.82	1,028.82
LBS PER UNIT	257.20	257.20

INSTALLATION NOTES

SIENAEDGE™

SienaEdge is a modular concrete retaining wall system that is used to stabilize and contain earth embankments, large and small. The SienaEdge wall system is a fully-engineered, structural retaining wall system constructed as either a "gravity" wall (no geogrid) or a geogrid-reinforced wall. It can be used for applications up to 30ft (9m) or even higher with proper design. The ideally-sized block provides fast, efficient machine-placed installation, while still offering a manageable weight for manual maneuvering if required. It eliminates complex estimations and ordering with the innovative multifunction block design, integrating standards & corners into the same block. The closed-end Standard block is ideal for building corners, ending two-sided seat walls and is able to create both vertical or battered walls, all with one block.

Contact Unilock Representative for actual color samples and availability. Unilock reserves the right to change product information without notice.
