CATALOG OF DREAMS

"A beautiful outdoor space should stand the test of time, every time."

Ed Bryant | Unilock Founder November 30, 1935 - January 28, 2021

Laying a Foundation for Inspiration

50 years ago, our founder had a dream. When Ed Bryant introduced the UNI-Stone paver to the North American market, he essentially established the hardscaping industry here. Since then, we have continued to innovate and grow. As a result, we are proud to have played a part in creating countless beautiful spaces, from backyard patios to landmark destinations across the continent. And we're just getting started. We know Ed would be proud.

Quality FOR US, IT'S PERSONAL

Over 50 years ago, our founder

stumbled upon a unique little European product called the UNI-Stone. Intrigued by the benefits of this revolutionary paving method, he decided to license the product and bring the concept to North America. He purchased a basic paver machine from Europe and hired a small staff to produce the stones.

In those early days, most sales of Unilock were to large-scale commercial properties and streetscapes. Any lapse in quality would be costly and would jeopardize our owner's personal reputation, so quality was of paramount importance.

From these humble beginnings, through to the multinational company we are today, Unilock has remained a family-owned company that puts quality first. For us, it's not just a matter of dollars and cents, it's our personal reputation that's on the line.

Homeowners, Contractors, Landscape Designers and Architects across North America know they can rely on us to supply them with top quality product every time.

The first Unilock press produced a humble 817 square feet of pavers a day.

UNI-STONE

Today we operate 13 manufacturing plants across North America.

UNILOCK QUALITY

ECHNOLOGI

" Innovation is really what makes this company... Just about every new product technology that's come into North America we developed and brought in."

~ Ed Bryant, Unilock Founder

For the past 50 years, Unilock has enjoyed close connections to European companies that keep us on the leading edge of product design and manufacturing processes. While other companies follow in our footsteps, Unilock continues to pave it forward with a growing history of industry firsts.

Over 50 years of Innovation

1972

UNILOCK INTRODUCES THE FIRST PAVING STONE TO NORTH AMERICA.

Founder Ed Bryant kick-started the entire industry, securing a license to manufacture and sell the iconic UNI-Stone from Europe.

UNI-STONE

1991

W UNI ECO-STONE

2007

FIRST PERMEABLE PAVER

We were the first to manufacture permeable pavers to address growing concerns around stormwater management. Today we have more permeable paver design options for residential and commercial projects than anyone.

1992

FIRST FACEMIX

Before Unilock Series, all pavers in North America were thrumix. We were the first to introduce facemix technology, now known as EnduraColor[™]. Some manufacturers are trying to market facemix as something new, but we've been selling it for more than twenty-five years.

2018

1993

TUMBLED PRODUCTS

The idea of 'antiquing' pavers for a timeworn look was something that many people said would never fly. But Brussels Block quickly became the most popular product in our line, leading to Brussels Dimensional wall, and scores of imitators.

BRUSSELS BLOCK

2022

THE NEXT 50 YEARS

This year marks our 50th anniversary as the industry trend-setter and we're investing more than ever before. Developing new products, processes and technologies that will pave the way forward for another 50 years.

2004

FIRST ULTIMA CONCRETE

Unilock remains the only manufacturer in North America with this technology. Ultima™ Concrete makes our Elegance products second-to-none in beauty and durability.

FIRST COATED PRODUCT

Unilock introduced Umbriano as the first product with EasyClean[™] stain resistance technology. Other factory sealed products have followed since then.

The U-Cara Multi-Face Wall was developed to deliver unlimited design flexibility with a single wa

design flexibility with a single wall system that brings EnduraColor finishes to vertical features. Only Unilock holds the patent for this product.

PATENTED U-CARA WALL

US PAT. 9,453,341

Ultima™

Only Unilock has the technology in North America to manufacture Ultima Concrete resulting in pavers up to four times stronger than poured concrete. With Ultima, the look you purchase is the look that will last.

What makes Ultima concrete so strong?

In a word, fluidity. During manufacturing, we use as little water as possible while enhancing the fluidity at the drying stage, resulting in a form that self-compacts at the chemical level. The result is an extraordinary product that is unlike anything you'll find outside of Unilock.

With Ultima

Unilock Town Hall[®] pavers are built to last

Without Ultima

Deteriorating brick pavers exposed to deicing salts

Ultima Concrete is a key ingredient in the **timeless elegance** of our Elegance collection of premium pavers.

Reala[™]

When it comes to creating realistic textures that are indistinguishable from brick, cobblestone, or flagstone, there is no room for compromise.

Any paver meant to imitate a classic building material needs to embody its look, its feel, and its strength. At Unilock, we've been capturing all three since 2004 with our unique Reala technology.

Utilizing REALA technology, a multitude of natural stone surfaces, brick and historic cobblestones are cast to create a **wide variety of authentic textures** with consistent dimensions that are **more cost efficient to install.**

How do we achieve a random appearance?

First, we cast a multitude of pavers from molds of actual flagstone, brick, and cobblestone. Then we randomize the casting process. With so much variation between molds, we can then ensure that any paver installation avoids repetition, no matter how large or small the project.

Nothing protects pavers from stains like EasyClean.

With EasyClean spills can be removed before a stain develops.

Unlike after-market sealers which merely coat the top, EasyClean goes beyond the surface and becomes integral to the product during manufacturing. **The result is enhanced surface color, and protection from stains.**

Pavers shown on left hand side are Thrumix pavers without EasyClean. Pavers shown on right hand side are EnduraColor pavers with EasyClean Stain Resistance Technology.

ColorFusion[™]

The look of natural granite is achieved when color and granite particles are randomly dispersed using proprietary ColorFusion technology to achieve a unique mottled surface.

> ColorFusion also available on our U-Cara® Multi-Face Wall System.

> Why do people love granite?

It's strong, beautiful and has an earthy, timeless look. Unfortunately, it's also expensive, extremely heavy and can be difficult to install. ColorFusion brings the look of granite to Umbriano for gorgeous, barefoot-friendly surfaces. No granite aesthetic is off-limits with ColorFusion pavers.

ColorFusion pavers are made with the same durable concrete and fortifying manufacturing processes that make Unilock pavers last for decades. Our commitment to beautiful, long-lasting hardscaping products is what built our reputation, and we honor that commitment through continued innovation. The elements of design begin with a dream of what's possible.

Envision an outdoor space where the inspired use of patterns, textures and shapes not only creates design-envy, but elevates your world in the most beautifully functional way.

A palette of light-colored pavers allows darker vertical features like the fire table to stand out.

Pavers: Beacon Hill[™] Smooth (Opal) with Beacon Hill Smooth (Midnight Charcoal) accent Fire Feature and Raised Patio: Lineo[™] Dimensional Stone (Midnight Charcoal) with Universal coping (Natural) and steps

Extend the Season

Raise the bar on your backyard patio by lifting it off the lawn. The clean architectural lines of this home set the tone for this simple but stunning raised patio with corner gardens.

Entertaining Ideas

From a complete outdoor kitchen to distinct areas for dining, lounging, sunbathing and mingling over cocktails, this is an entertainer's dream. Architectural elements such as low walls, planters, pillars, a custom fireplace, and water features add to the contemporary vibe.

Pavers: Umbriano[®] (French Grey) with Town Hall[®] (Basalt) accent

Walls: Lineo Dimensional Stone[™] (Limestone) with Lineo Dimensional Stone (Midnight Charcoal) accent

Fireplace: Lineo Dimensional Stone (Limestone) with Series[™] (Onyx Black) accent

Steps & Coping: Natural Stone

The look of natural granite pavers manufactured with EasyClean[™] stain protection means the occasional party spill is easily wiped clean.

Escape Artistry

With a minimalistic design and cues borrowed from the home's monochromatic shades, this paver deck creates seamless flow to the serenity of the pool.

Beacon Hill[™] Smooth (Opal) with Beacon Hill Smooth Dark Charcoal accent

Some classics never lose their charm. Enhance a home's modern architecture with an authentic cobblestone driveway for blended beauty that never fades.

Courtstone[®] (Basalt)

Richcliff°(Dawn Mist and Pebble Taupe)with Courtstone°(Basalt) accent and Ledgestone[™] (Buff)coping

Classically elegant and strikingly detailed riven surface texture makes Richcliff the perfect match for this arts and crafts style home.

Warm Welcome

An inset border of Unilock Courtstone pavers gives extra dimension and helps visually define broad steps leading up to the front door.

Cutting Edge

Pavers are laid on the diagonal and boldly outlined with multi-layered border, which accents the planting bed and garden walls.

Take a seat at the table in the outdoor dining area, cleverly defined by a mix of 90-degree and 45-degree paver patterns and striking borders.

An original geometric design at the front entrance provides inspiration for imaginative garden beds.

Pavers: Bristol Valley[®] (Steel Mountain) with Copthorne[®] (Basalt) accent

Water Feature: Lineo™ Dimensional Stone (Midnight Charcoal with Lineo Dimensional Stone Limestone accent and Natural Stone coping

Front-to-Back Flexibility

Bristol Valley is a refined paver that is soft underfoot, but still has a subtle surface texture. A paver so versatile, it can go from elegant front entrance to stunning walkway to a cool-to-the-touch pool deck. That's not asking too much, is it? No. And while you're at it, add a tranquil water feature for effect.

Upper Pavers: Bristol Valley^{*} (Steel Mountain) with Town Hall* (Basalt) accent

Left Pavers: Artline[™] (Granite) and Artline (Granite Blend II Campo[®]) with Town Hall[®] (Basalt) accent

Seat Wall, Firepit and Grill Island: Lineo™ Dimensional System (Limestone) with Ledgestone[™] (Buff) coping and step treads

Elevate an Intimate Space

This space is a smart blend of form and function. Low border walls double as extra seating around a sleek firepit in the sunken lounge area, while Artline pavers laid on a 45-degree angle lend a contemporary vibe. An L-shaped grill island is positioned next to the dining area.

29

A driveway paved with large rectangular pavers placed at a 45-degree angle meets a soft curve at the garage door for a bit of the unexpected every day.

Pavers: Copthorne^{*} (Basalt) pathway with Richcliff^{*} (Dawn Mist) Step Treads: Natural Stone (Stone Cliff Grey)

Anything but Everyday

Pavers in a classic herringbone pattern fill in a gently curving path helping to define walking areas and lead guests to the front door. The darker tones match the driveway pavers for a smooth, consistent look.

Fireside Embrace

Kick back with friends and let relaxed conversation and soothing beverages melt the week away. This warm backyard escape is embraced by a curved half wall, and a paver patio outlined with triple row banding.

Pavers: Richcliff* (Dawn Mist) with Copthorne*(Basalt) accent Firepit and Grill Island: Natural Flagstone

Pavers: Beacon Hill[™] Smooth (Granite) with Mattoni[™] (Dark Charcoal) accent

Grill Island: Lineo[™] Dimensional Stone (Limestone) with Mattoni (Dark Charcoal) accent

Smart Design

Your small-space patio makes a big impact with an L- shaped, multi-purpose outdoor kitchen that accommodates a barbecue, smoker, pizza oven and storage cabinets. Nearby, a stylish firepit and seating area invites loungers.

Mixed shapes and textures within a continuous color scheme creates subtle visual interest.

Upper Pavers: Artline" (Granite) with Mattoni" (Dark Charcoal) Lower Pavers: Westport" (Granite) with Mattoni (Dark Charcoal) Seat Walls & Retaining Walls: Brussels Dimensional System" (Limestone) with Copthorne" (Basalt) accent and Ledgestone" (Buff) coping

Grill Island and Firepit: Lineo[™] Dimensional Stone (Limestone) **Steps:** Ledgestone[™] (Buff) coping and steps

Fire and Water in Harmony

When pool play is over, step up to the adjacent patio set apart by pavers laid at a 45-degree angle. Later, the warmth of the fire table flanked by fire-topped pillars and surrounded by low walls with built-in seating and comfy pillows beckons.

Smooth minimalistic slabs placed in a running bond pattern are contrasted by the graphic linear pattern used in vertical elements.

Pavers: Beacon Hill[™] Smooth (Opal) with Copthorne^{*} (Basalt) accent

Fire Feature and Grill Island: Lineo™ Dimensional Stone (Sandstone, Dark Charcoal and Limestone - blended on site)

Seat Wall: Lineo Dimensional Stone (Sandstone, Dark Charcoal and Limestone - blended on site) with Copthorne (Basalt) accent and Universal coping (Natural)

Graphic Design

Make your backyard the envy of the neighborhood with a daring combination of paver color tones and finishes. This entertainer's delight includes an outdoor kitchen, a fire table "room" with u-shaped seating walls, a large paver patio area to ground the dining, seating area, and an above-ground pool.

Command Your Place in the Sun

Smooth slabs in muted tones create an elegant pool deck that is cool underfoot, and lets the infinity pool take center stage. Paver slabs surrounded by turf form a popular mosaic pattern and unique "carpeting" for adjacent seating areas.

Pavers: Beacon Hill[™] Smooth (Opal) with Copthorne[®] (Basalt) accent Pillars and Steps: Brussels Dimensional System[™] (Mahogany Ash) with Brussels Fullnose[™] (Mahogany Ash) coping Slabs: Umbriano[®] (Winter Marvel)

Follow Your Path

Old world charm mingles with modern-day style. A sleek paver field contrasted with the rustic look of historic street pavers takes you from dining area to hot tub to cozy fire table in this all-inclusive retreat.

Pavers: Umbriano" (Summer Wheat) with Copthorne" (Basalt) walkway and accents Vertical Features: Lineo" Dimensional Stone (Limestone) with Series" (Onyx Black) accent and Universal coping (Natural)

Resistance is futile. Pavers laid in a fine herringbone pattern take you down the path to a captivating setting.

The silky, matte texture and unique speckled surface of Arcana catches the sparkle from the refreshing water.

Oasis of Calm

There is so much to appreciate in this serene setting. Large-format pavers laid in a running bond pattern ground the relaxed, minimalist design of the pool area. When you feel the need for company, a complete outdoor kitchen makes this backyard oasis an entertainer's dream.

Pavers: Arcana" (Modena) with Series" (Onyx Black) accent and Fullnose" (Limestone) coping Grill Island: U-Cara* (Granite) with U-Cara Series" (Onyx Black) accent

Dynamic Patio

In challenge lies opportunity. Angular, terraced retaining walls address elevation changes in a sloped yard and create a next-level stage for intimate outdoor gathering spaces.

A herringbone paver pattern surrounded by a contrasting border gives the feeling of an area rug to define the relaxed lounge area.

 Pavers: Beacon Hill[™] Smooth (Granite) with Mattoni[™] (Sable Blend, Dark Charcoal and Granite Blend) paver rug and accents
Firepit: U-Cara[®] Pitched (Granite) with Natural Stone (Stone Cliff Grey) coping
Step Treads :Natural Stone (Stone Cliff Grey)

A blending of natural stone and historic brick textures laid in a variety of patterns makes this project a visual feast.

Richcliff* (Dawn Mist) with Copthorne* (Basalt) paver rug and Courtstone* (Basalt) accents and Natural Stone (Stone Cliff Grey) slabs

The Difference is in the Details

Taking its cue from the warm tones of the home, this elevated patio embraces its guests with timeless charm and comfort. The cool grey tones of the pavers complement the wood features and mosaic metal fencing.

Capture the eye with *exclusive* products that are style-forward and functional in the extreme.

From time-worn cobblestone to modern, linear pavers, our product array takes you beyond the horizontal to garden walls, pillars, steps, fire tables and fountains. Discover a look that is unmistakably you – undeniably Unilock.

Unilock Product Categories

CLASSIC

Our budget-friendly, Unilock Classic pavers and walls are manufactured to exceed ASTM standards for quality and strength. Available in classic shapes and styles, these products utilize a traditional product mix of large and small aggregates that is consistent from top to bottom with color mixed throughout.

The refined surface of Unilock EnduraColor products is achieved with a two-step manufacturing process that combines a base of coarser aggregates for a stronger foundation with concentrated color and wear-resistant finer aggregates on top. This process protects the surface from the appearance of fading over time because the top layer prevents large, lighter color aggregates from ever showing through. Now, with U-Cara°, walls are available with EnduraColor too!

Deep, rich colors and a multitude of unique Reala[™] textures combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can't get anywhere else. Thanks to Ultima[™] Concrete, the look you purchase is the look that will last, with up to **4x the strength of poured-in-place concrete**.

PERMEABLE

Developed in response to growing concerns around stormwater management, permeable pavers allow rainwater to flow between the joints and back into the subsoil. This provides a dual "green" benefit: it reduces the amount of water sent to storm sewers, and instead provides extra moisture to surrounding plant material.

The pavers used in a permeable installation look similar to traditional pavers, but are made with special spacer bars that create a wider joint.

Special materials are used in the joints and in the permeable base below, to encourage water to flow through and reach the subsoil.

Using permeable pavers will reduce puddling on the pavement when it rains, and decrease ice build-up in winter.

Richcliff

Exclusive to **UNILOCK**

Inspired by the texture of natural cut flagstone, Richcliff offers superior durability and timeless appeal ideal for driveways, patios, walkways and commercial projects. A multitude of stone textures were cast using Reala[™] Technology, to ensure that finished projects will have a completely random and natural appearance. And unlike natural stone, which can crack, split and fade, Richcliff is virtually indestructible.

Dawn Mist

Deep rich colors and unique textures

Town Hall[®] 🖉

Exclusive to **UNILOCK**

The substantial proportions and unique color blending of Town Hall are modeled after historic North American clay street pavers. The timeless look makes it an excellent choice for driveways, patios, walkways and more, in either traditional or permeable applications. The rich colors and classic shape also make it popular for borders, banding and other accents. To ensure projects have a random appearance, Town Hall textures were cast from a multitude of different surfaces using Reala[™] Technology. The result is vintage, streetscape charm that stands the test of time.

Deep rich colors and unique textures

Making Your Project Unique

Using Unilock finishing touches can make all the difference in the world to your finished product. With special attention to the details, your landscape dreams can soar above your expectations!

Borders & Accents

The creative use of Unilock borders and banding adds a touch of elegance to your driveway, walkway, patio or vertical features. Use them to enhance your design selections and create distinctive designs.

Paver Quilting[™] Design Reference Guide Unilock was the first to introduce the concept of paver design accents more than **20 years ago.**

LAYING PATTERNS

One of the factors that makes your landscape project unique is the laying pattern you choose. Your contractor can recommend the best laying patterns for the product you've selected.

Visit Unilock.com for laying patterns.

Firepits & Fire Features

Imagine the pure joy of sitting around an outdoor firepit with your friends and family! Envision getting cozy on a cool night and enjoying the mesmerizing flames from your backyard Unilock firepit or fireplace. It's a dreamer's dream come true!

HEAT DAMAGE PREVENTION

To ensure a long lasting fire feature, direct exposure to extreme heat from an open flame should be avoided. Always construct fire features with a protective heat barrier such as a metal insert, refractory blocks or approved firebrick to prevent potential heat damage.

Sunset Firepit Kit Square shape also available.

FIREPIT INSERT

Sold Separately

Firepit kit comes with a firepit insert that fits securely into the firepit. 139

Outdoor Kitchens

An outdoor kitchen has a certain element of extravagance. It's an entire, defined space dedicated to the preparation of meals among family and friends – set outside, no less.

From a practical side, an outdoor kitchen extends your home's living and entertaining space and allows you to make the most of your backyard.

Design Considerations

If you're considering adding an outdoor kitchen to your outside escape, you likely have questions. You need to think about how you'll use the space, the outdoor appliances you need, the best location for a kitchen in your yard, and how it will weather the elements over time.

Read all about the seven things you should consider when designing your outdoor kitchen.

Pillars & Water Features

Pillars add a sense of permanence and strength to your landscape design, creating visual interest with height variation and functionality. Pillars are great for creating a visual anchor to walls and a place for extra lighting. By adding pillars, you can take your project to the next level.

Looking for Something Different? Speak to your contractor about using Unilock products to build a custom feature that's just right for your project.

From fountains and ponds to waterfalls and custom water features, these soothing additions are a popular way to enhance your landscape design.

Creative Ideas

The versatility of Unilock products provides a playground for your imagination. From mixing patterns and colors to create a custom sports court, to utilizing Unilock wall systems to beautify a utilitarian window well, the possibilities are endless!

This small storage area becomes a thing of beauty, paved with Unilock Beacon Hill[™] Smooth and Universal Coping treads.

With the right help, knowledge and preparation, you can turn your ideas into bold, exciting reality.

You want a dramatic look that sparks curbside conversation. If getting there seems daunting, turn to our people, plans and tools. We've got you. And you've got this.

Learn About Unilock Coatings & Finishes

Discover the perfect combination of Unilock features and finishes for your next project.

The more you know, the more you'll understand why Unilock is the best choice of all.

Coatings & Finishes

EasyClean

Available only on EnduraColor products, EasyClean enhances the surface color and provides integral protection from stains. Unlike after market sealers, it does not need to be re-applied.

ARTISTA

The look of boldly mottled granite is achieved with this proprietary process called Artista.

BRUSHED FINISH

Only Unilock offers this unique surface, enhanced with graphically interesting etched lines.

SOFT TOUCH

The ultra-smooth and silky surface texture of these products is achieved with a special finishing process that results in a luxurious surface that feels soft underfoot.

ANTIQUED FINISH

Different methods are used to achieve this distressed, timeworn finish on different products, but in every case this patina enhances the look.

EXPOSED GRANITE

Granite, Quartz and Marble particles are embedded in the surface of the product and then revealed using additional processing methods.

The look of natural granite is achieved when color and granite particles are randomly dispersed using proprietary ColorFusion technology to achieve a unique mottled surface.

While there are many contractors and designers who still prefer to draw by hand, more and more plans today are being created digitally and in 3D.

If you're having trouble imagining what your project will look like when it's complete, a 3D design can really help.

3D Rendering Created with $\mathsf{Uvision}^*$ **3D** Design Software

Speak to your contractor about how 3D design can help you visualize the possibilities for your project!

Construction Process

The quality of the work that's done to prepare the base for your pavers and walls is extremely important. A proper base ensures that your pavers and walls won't shift out of place during freeze/thaw cycles.

STEP1 | EXCAVATION

The first step in any project is excavation of grass and topsoil. The depth will depend on two factors:

- 1. Soil Type Clay soil requires deeper excavation; sandy soil requires less.
- 2. Use Heavy loads like driveways and retaining walls require deeper excavation; lighter loads like patios and walkways require less.

Depth of excavation can be reduced significantly if a layer of DriveGrid[™] is placed at the bottom of the excavation before the gravel gets placed. Loose subsoil resulting from the excavation process should always be compacted before DriveGrid and gravel are placed.

STEP 2 | GRAVEL BASE

The excavated area will be filled with a gravel base. This gravel base needs to be:

- Strong enough to handle the load of whatever is placed on the surface.
- Free draining so that water drains out of the base into the subsoil. Retaining walls may require a perforated drain pipe in the gravel base to direct water away from the base of the wall.
- Extended at least six inches beyond the edges of the finished paver surface.
- Compacted in several layers, using the proper equipment.

Learn about frequently used terms in the hardscape and landscape industry.

STEP 3 | BEDDING LAYER

A 1" (25mm) layer of sand or tiny stone chips is spread out and smoothed on top of the solid gravel base. This layer allows paver or wall units to be leveled or sloped for smoothness and drainage.

Some contractors may recommend a poured concrete surface instead of a typical bedding layer, which is fine as long as the concrete is accurately poured and sits on a stable and well-drained base.

Note: Once concrete is poured, the height of paver or wall units can no longer be adjusted.

STEP 4 | RESTRAINT SYSTEM

For pavers, an edge restraint will be secured with long metal spikes or a concrete edge will be installed to prevent perimeter pavers from drifting out. For walls, glue may be used to secure rows of blocks. Larger retaining walls may require geogrid every few layers to secure the wall into the soil that is being retained.

STEP 5 | JOINT MATERIAL

The color you choose for joint material impacts the overall aesthetic. It also plays an important role between pavers by keeping out weeds and other debris. Your contractor can help you decide which joint material is right for your project.

There are two types of joint material to choose from:

Basic Jointing Sand – Years ago, this was the only joint material available. As it wears away, issues with weeds could arise. If you choose a basic sand, we recommend that you use a joint stabilizing sealer and be prepared to replenish the sand when needed.

Polymeric Sand – This special sand stays in place longer because it is combined with a binding agent. However, it's not right for every project and needs to be installed with care to prevent hazing.

BLACK SAND

GREY SAND

STEP 6 | SEALING

Unilock pavers will be durable with, or without, a sealer. Some homeowners choose to apply a sealer to enhance the color of the pavers, while others choose to appreciate the color of the pavers as they age. Some Unilock pavers are sold factory sealed. If you choose to seal, you should plan to re-seal every 3-5 years.

TAN SAND

Factory-Sealed Products

Elegance[®] Pavers and Unilock pavers manufactured with EasyClean[™], have been pre-sealed in the factory and do not require sealing after installation. To clean and brighten the surface at any time, a gentle power washing of the surface is recommended. If you still wish to reseal the surface, you must wait a minimum of 3 years before applying sealer. Only use solvent-based sealers.

PAVER CONSTRUCTION

WALL CONSTRUCTION

Finding the Right Contractor

Choosing the right contractor for your project is the most important decision of all because even the best materials can be spoiled by poor installation and workmanship. Be sure to ask the right questions and keep in mind that the cheapest quote is rarely the best option.

NEED HELP FINDING A QUALIFIED CONTRACTOR?

Our Referral Program will match you with a highly competent contractor who meets the rigid standards we impose to ensure the best quality work and results. Simply contact us online, by phone or at one of our locations and we'll help you find a contractor guaranteed to do the job right.

Register online at Unilock.com and we'll match you with a Unilock Authorized Contractor in your area.

8 Tips for Choosing A Contractor

WORKMANSHIP

- > Ask to see projects the contractor completed more than two years ago so you can see how their work holds up over time.
- > Are the pavers laid in a way that minimizes awkward cuts?
- > Are the curves of the project cut in a way that minimizes large gaps?
- > Have edge restraints been used and still in place?
- > How long does the contractor guarantee the work?
- > How many warranty claims has the company had in the past two years?

Some contractors will hire other companies to perform parts of the work, like lighting and irrigation. Be sure to ask the contractor about these sub-contractors and how they will be managed.

3 RELEVANT EXPERIENCE

- > How long has the contractor been installing pavers and walls?
- > Has the contractor installed projects in the past with the features you're considering (eg. a raised patio, retaining wall or water feature)?

4 BASE PREPARATION

- > What are the contractor's base preparation methods?
- > What materials are used and why?
- > Is there a standard procedure for base preparation or will the contractor assess your site's unique needs?

- Ask the contractor how far in advance they are booking projects and how long your project might take.
- > What are the contractor's payment terms?
- > Is an upfront deposit required to secure the timing of the project?

6 DOCUMENTATION

- > Does the contractor have the proper licensing for their work?
- Does the contractor have liability insurance and are employees covered by Workers Compensation?
- > Will there be permits required for the job and if so, who is responsible to secure them?

- > Do you like this contractor? Can you easily communicate and understand each other? Is this someone you can trust?
- > Ask if the person you're meeting will be on site throughout the project or if someone else in the company will be your day-to-day contact person.
- Contacting references can help you understand how the contractor operates throughout a project.

- Does the contractor offer a design service? Is there a cost for this?
- > Is the design hand-drawn or rendered in 3D?
- > Are the contractor's designs something you would like for your project?

Protect Your Investment

Learn how to take care of your Unilock products to ensure that they stay beautiful and functional for years to come.

Prevent weeds before they take root

When a proper base is installed, there is no soil directly beneath your pavers for weeds to grow. However, if the joints are not kept full with jointing material, it is possible for dirt and weed seeds to blow in from the surrounding area and germinate in the joints.

IN THE PAST - a basic sand was the only jointing material available. Unless it was replenished regularly, rain would erode the sand, leaving joints vulnerable to weeds.

TODAY - new varieties of sand-stabilizing compounds and polymeric jointing material are available which relieves homeowners from this maintenance burden. See page 153 for more information on jointing material choices.

Spring Maintenance

Although most Unilock products are designed to be low maintenance, there are a number of preventative maintenance steps that can be performed each spring to ensure that your project keeps its pristine appearance throughout patio season.

Check for "creep" – this is where the stones push out (due to winter stress, traffic or failure of the edge restraint), dips, deformations or stains. Should you discover any of these problems, they are all fixable.

Visit Unilock.com or speak to our friendly Unilock staff to find solutions.

Fall Maintenance

The most important thing to do in the fall is to keep leaves and other debris off your stones. Remove any plant pots, furniture, urns and BBQs that can leach rust onto your surfaces.

Winter Maintenance

While Unilock products are de-icing salt-resistant, it is highly recommended to use calcium-based products or rock salt (sodium chloride) to melt ice. Use a plastic shovel and plastic blade protectors on snow plows or blowers to protect the surface.

NOTE: Avoid magnesium-based de-icing products as they are very aggressive and may cause damage to the concrete surface.

The Choice of Design Professionals

The same Unilock products available to homeowners have been relied upon by architects, landscape architects and engineers for decades, to create world class commercial spaces across North America.

Like a good artist chooses only the best paint, the very best contractors use exclusive Unilock colors, textures and styles to showcase their creativity and workmanship.

Our Quality Commitment

Unilock was the first concrete paver manufacturer in North America to offer a Lifetime Guarantee, and since then we have continued to stand behind it to ensure customers are completely satisfied with our products. With almost 2 billion stones in the ground, that's quite the commitment!

Our products are better and stronger than other brands. In fact, our internal standards of manufacturing in the USA and Canada far exceed industry standards set by ASTM (American Society for Testing and Materials) and CSA (Canadian Standards Association) and other European organizations.

LIFETIME GUARANTEE - RESIDENTIAL

Our Transferable Lifetime Guarantee warranties the structural integrity of Unilock concrete paving stones and retaining wall units when used in residential applications. It covers any structural failure or deterioration of the concrete unit resulting from normal use or from the reasonable application of sodium chloride (common rock salt used for de-icing). StoneMark[™] products have the same warranties as Unilock paving stones and retaining walls, but cannot be warrantied against damage resulting from de-icing products.

Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Proof of purchase is required. Customers are encouraged to submit receipts to us as soon as their project is complete, using the Unilock Warranty Registration Form on our website (Unilock.com).

Purchasers need to ensure that the product they purchase is appropriate for their intended application; for example, only certain thicknesses of products are appropriate for driveways. Color matching of the replacement product and/or lost time cannot be guaranteed and labor costs related to installing replacement product is not included. Unilock reserves the right to seek a professional diagnosis and opinion to determine the exact cause of the product failure. If the failure falls within our warranty parameters, Unilock will replace the defective product.

EXCLUSIONS – Unfortunately, some things are beyond the control of Unilock, and are therefore not covered by this warranty. These include: naturally occurring efflorescence, hazing from polymeric jointing sand, scratching and chipping resulting from snow removal or construction equipment, damage caused by natural or un-natural disasters, or negligence by anyone other than Unilock. The Unilock warranty also does not cover deterioration or damage as a result of poor design or poor installation practices that are contrary to specifications as laid out by ICPI (Interlocking Concrete Pavement Institute) and the NCMA (National Concrete Masonry Association). For more information please visit www.icpi.org and www.ncma.org. Additionally, please refer to the Maintenance, Color and Installation Advisories.

MAINTENANCE ADVISORY

1. Cleaning and Sealing

As with anything that is outdoors, Unilock products are subject to harsh weather, dust, acid rain, leaf stains, water stains and general wear from foot or vehicular traffic. Therefore, periodic cleaning using environmentally safe detergents designed for cleaning concrete is recommended to maintain a bright, fresh appearance.

To make subsequent cleaning easier and more effective, a concrete sealer can be applied to new or cleaned products to help prevent the penetration of substances that can cause stains.

There are many types of concrete cleaners and sealers on the market. Always read the instructions carefully before using the product to make sure that it will function as expected. Testing first, in a small unobtrusive area, is always a good idea to ensure the results are acceptable. Consult your local hardscape dealer to find the products best suited for your paver or wall installation.

Visit Unilock.com to register for your Transferable Lifetime Guarantee.

2. Winter Maintenance

Snow removal by way of metal blades on plows or shovels will scratch and chip the surface of pavers, causing permanent damage. To mitigate this risk, metal snow clearing blades must always have a polyurethane or rubber cutting edge attached when plowing pavers.

De-icing Salts - The use of de-icing products on paver surfaces is important for safety and to help mitigate snow accumulation. Most de-icing products will have some effect on concrete, even if the product label indicates that it is safe on concrete. If you must use a de-icing product, we recommend that you use Sodium Chloride (ordinary rock salt) or Calcium Chloride (for colder climates). Always apply sparingly. The use of de-icing products on StoneMark, wet-cast pavers, slabs or coping may damage the product and therefore is not recommended. Whenever possible use a coarse sand as an anti-slip measure instead of de-icing chemicals.

COLOR ADVISORY

1. Selection

Due to the inherently variable nature of printed materials and digital monitors, Unilock cannot guarantee that products will match the color of printed or online images. Therefore, when making final product selections, decisions should be made based on actual stones which are readily available from Unilock, Authorized Contractors or Authorized Dealers. Most Unilock products are not comprised of a single color, but rather contain blended colors for a more natural appearance. This means that there will be significant color variance from stone to stone, so purchasers should view multiple units together to get a more accurate impression of the overall color.

Note: Unilock Natural Stone variations are outside the control of Unilock. Purchasers of natural stone must be willing to accept this inherent variability.

2. Pre-installation checking

Always check the label to ensure that the Unilock product delivered to your project is the product and color ordered. If there is a discrepancy, or if the product inside the packaging doesn't appear to be correct, contact your hardscape dealer before installing any pavers or wall units. If the product is installed, it indicates your acceptance of the products as delivered.

3. Blending

If the project requires more than one bundle of product it's always a good idea to draw product from several bundles when installing, as this ensures that any variation between bundles will be seamlessly integrated in the project. When bundles are from different production runs, random selection from multiple bundles is even more important.

4. Efflorescence

Efflorescence is a naturally occurring process that may appear as a white or light grey powder on the surface of concrete, clay or natural stone. It is temporary, and will disappear over time. However, if it is bothersome, an efflorescence cleaner can be used to remove it. There is no way to predict or prevent efflorescence. Because it does not compromise the structural integrity of the product, it is not covered by Unilock product warranties.

INSTALLATION ADVISORY

1. Construction Residue

While a certain amount of dirt on pavers and walls is inevitable during the construction phase, installers are strongly encouraged to clean as they go as construction residue can embed in the surface and become difficult to remove. The slurry produced during wet-saw cutting is particularly stubborn to clean if allowed to dry on the surface of pavers. Unilock warranties do not cover stains caused by a failure to remove construction residue.

2. Polymeric Haze

Surface hazing caused by polymeric jointing sand is not the responsibility of Unilock. Polymeric jointing sand should only be installed by an experienced and knowledgeable contractor. Any sand that is left on the surface prior to activation will result in a haze that is very difficult and time-consuming to remove. Only the highest quality, brand name polymeric sand that is guaranteed by the manufacturer should be used.

3. Compaction Damage

Both smooth and textured paver surfaces can be scratched by compaction equipment used to 'flatten' a new paver installation. Therefore, metal plate compactors must be fitted with a polyethylene mat to protect the paver surface from becoming scratched, or a superior option is to use a rubber-roller compactor instead. Damage to product surfaces caused by failure to follow these instructions is not covered by Unilock product warranties.

FIRE PIT WARNING

Wood-burning fire pits must be lined with a proper metal insert or refractory (fire-rated) brick to protect the concrete components from extreme exposure to heat. Extreme heat on a concrete surface may affect the structural integrity of the concrete and can be dangerous. The floor of the fire pit should always be constructed using refractory brick or a sand bed. For your safety, always use a spark screen over the fire.
